3M Industrial Adhesives and Tapes

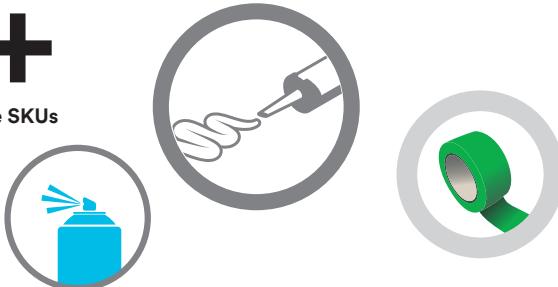

Design & Production Guide | October 2019

5,000+

adhesive and tape SKUs

Do it your way.

- 3M systems are built around your manufacturing processes, not the other way around.
- Whether it's structural or non-structural adhesives, bonding tapes or reclosable fasteners, 3M solutions ensure speed, convenience and ease of use.

88,667

employees

Do it together.

- No matter what you need to bond, you can count on 3M's expertise, technologies and 88,667 dedicated employees to help you find solutions.
- From wood, metal, foil, insulation, foam, fabric and panel lamination to specialty high performance and multipurpose materials of every kind, solutions are one call away.

Finding your
3M Adhesive & Tape
Assembly Solutions

100,000

patents

Do it boldly.

- 3M has been a world leader in bonding technology for decades and we have the patents to prove it.
- Quality, consistency and reliability — the attributes you look for in a bonding solution — help drive our quest for new innovations.

1
chance to do it right

Do it responsibly.

- Sustainability is a natural extension of 3M's corporate values.
- We developed the first water-based contact adhesive ever — more than 40 years ago.
- We have a wide selection of Low VOC products that help contribute to LEED® credits and are GREENGUARD Certified.

3M™ Adhesives and Tapes for design, assembly and production.

What can 3M™ Adhesives and Tapes do for your product and process?

Build strong, durable products:

- From repositionable to permanent, 3M has an adhesive or tape that can be readily matched to the substrate and stress characteristics needed in the joint.

Improve appearance and aesthetics:

- 3M adhesives and tapes are generally hidden between the bonded substrates, offering nearly invisible fastening.
- Surfaces stay smooth and clean for a more attractive appearance and less surface refinishing.

Lower production and material costs:

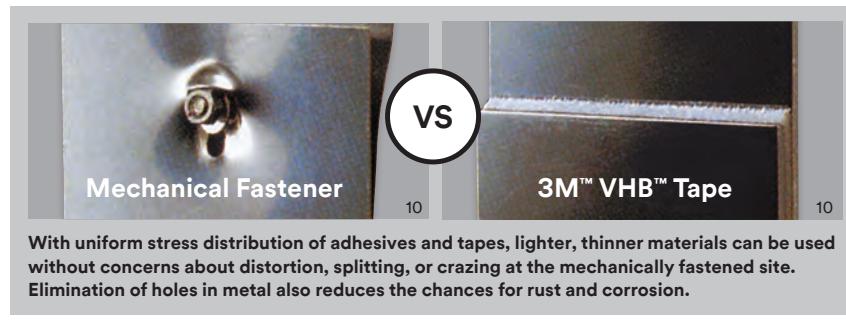

- Reduce process steps such as weld grinding and sealing individual penetrations from screws, nuts and bolts.
- Use thinner, lighter or less expensive materials that cannot be welded or fastened traditionally.
- Potentially lower capital investment. Many adhesives and tapes do not require major capital to use.
- Manage labor costs. Many tape and adhesive technologies require little operator training.

Build products with a continuous bond line:

- Adhesives and tapes uniformly distribute stress along the entire joint. Nuts, bolts and other fasteners concentrate stress at a point which can decrease physical properties of the substrates being assembled.
- Bond and seal simultaneously. Many 3M adhesives and tapes will provide a strong bond, but are also an effective seal against dirt, dust, water and other environmental conditions.
- Good fatigue resistance. If your parts are subject to vibration or other movement, the viscoelastic nature of 3M adhesives and tapes will impart flexibility to a joint or bonded area.

Wider material selection for assemblies:

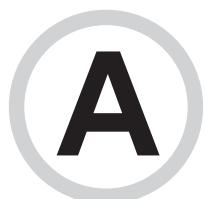

- Lighter and thinner materials can be used. Welding and fastening weaken substrates and require a minimum thickness to retain integrity.
- Bond dissimilar materials. 3M adhesives and tapes bond to a wide range of substrates from metals, wood, glass, plastics and ceramics. This includes "hard to bond," low surface energy materials.
- Prevent galvanic corrosion. 3M adhesives and tapes can provide a film barrier to reduce or prevent bimetallic corrosion that can occur when joining to different types of metals.

3M™ Adhesives and Tapes Product Family

Considerations when selecting 3M™ Adhesives and Tapes for your product and process.

Assembly

What type of assembly is required? (Refer to 7 common assembly types in the right hand column.)

What are the overall performance needs of the assembly (flexibility, high peel strength, etc.)?

Substrate

What are the materials that are being bonded together? (Refer to the substrate selectors for each assembly type on pages 4–15.)

Consider the surface condition texture of each material.

Process

What is the current assembly and manufacturing process?

Does the solution need to fit into the current process/equipment or can the process/equipment change?

What are the various process steps and how quickly will the assembly be moved to each step?

At any time, might the assembly bond need to be repositioned? If so, why and when?

Are there any environmental, regulatory or workplace safety restrictions?

End-Use

How and where is the final product used?

Will the assembly be exposed to harsh environmental conditions (UV, chemicals, high humidity, very high or low temperatures, etc.)?

Cost

Where can improvements be made in the assembly process (labor, reduction of process steps, materials, workflow, etc.)?

What are Panel to Frame Assemblies? What are Stiffener to Panel Assemblies?

Panels are used in multiple markets, such as transportation, metalworking and construction.

Panel to Frame: Decorative or load bearing panel that is applied to a rigid frame or support. **Examples include trailer panels, elevator walls and sign boxes.**

Stiffener to Panel: Stiffeners are applied to panels to give extra support and rigidity. **Examples include trailer wall panels, traffic signs and large metal enclosures.**

Possible Adhesive or Tape Requirements:

- Dead load holding strength
- Flexibility for dynamic loads and thermal expansion mismatch
- Fill a gap or variation in fit from end to end
- Provide a water seal

Best 3M Solutions for Panel to Frame/Stiffener to Panel Assemblies

■ 3M™ VHB™ Tapes (pg 72–79)

These high-strength bonding tapes are a proven alternative to screws, rivets, welds and other mechanical fasteners. 3M™ VHB™ Tape offers instant strength, a high ultimate bond and seals simultaneously. 3M™ VHB™ Tape's viscoelasticity allows relative movement of parts for thermal expansion/contraction. Best for flat to flat applications with a consistent bondline thickness.

■ 3M™ Scotch-Weld™ Structural Adhesives (pg 18–34)

Acrylic, epoxy and urethane structural adhesives that hold over 1,000 psi in overlap shear strength. Best suited for thinner bondlines, irregular shapes and textured surfaces where load-bearing strength is needed. Provides the highest load-bearing strength and environmental resistance.

■ 3M™ Adhesive Sealants (pg 64–68)

Acrylic, polyurethane, nitrile and hybrid one-component adhesive technologies with outstanding sealing properties. These products are capable of filling larger and irregular gaps including rough substrates. Highly flexible formulations allow for relative movement for thermal expansion/contraction.

■ 3M™ Reclosable Fasteners (pg 96–99)

3M™ Dual Lock™ and 3M™ Hook and Loop Reclosable Fasteners for strong yet easily removable fastening solutions. These products are ideal to allow access for servicing or replacement of a panel. Generally backed with 3M™ VHB™ Tape or other 3M adhesive technologies.

Performance Factors for Panel to Frame/Stiffener to Panel Assemblies

All 3M technologies in the table below are commonly used in panel applications.

Use the table below as a relative comparison of product performance.

Good = + Better = ++ Best = +++

29

This guide lists products that are commonly used for this specific application. It is important that the customer evaluates these suggested products in their specific application.

What are Small Joint Assemblies?

Small joint assemblies exist in multiple markets, such as sporting goods, electronics, furniture, motors and electrical.

292

Small Joint: Small joints are typically irregularly shaped but only a few inches of overlap area. They may be insertion joints or overlap joints, or some combination. **Examples include sporting goods (e.g., golf club heads to shaft), plastic casings, lens mounting for instrumentation, mortise and tenon furniture joints, thread locking or shaft retarding, magnet bonding and jewelry making.**

Possible Adhesive or Tape Requirements:

- Low viscosity for tight fitting parts
- Vibration resistance
- Very high strength
- Bond dissimilar materials

Best 3M Solutions for Small Joint Assemblies

■ 3M™ Scotch-Weld™ Structural Adhesives (pg 18–34)

Acrylic, epoxy and urethane structural adhesives that hold over 1000 psi in overlap shear strength. Best choice for highest strength, fatigue and environmental resistance especially for metal to metal bonds.

■ 3M™ Scotch-Weld™ Instant Adhesives (pg 37–39)

One part solvent-free adhesive that reaches handling strength in 5–10 seconds. Best for small bondlines (<10cm²). Commonly used on rubbers and plastics. Very tight bondlines are achievable with near instant strength.

■ 3M™ Hot Melt Adhesives (pg 45–51)

100% solid, thermoplastic resins that reach bond strength in seconds. Best for wood and plastic.

■ 3M™ Scotch-Weld™ PUR Adhesives (pg 35–37)

One component, hot applied thermosetting adhesive with immediate strength and holding power. Final cured strength over 1,000 psi. Best for wood and plastic.

■ 3M™ Scotch-Weld™ Retaining Compounds (pg 41)

One-part anaerobic adhesives cure between metal surfaces. Permanent and removable grades are available.

■ 3M™ Scotch-Weld™ Threadlockers (pg 40)

One-part anaerobic adhesives cure between metal surfaces. Permanent and removable grades are available.

292

What are Large Surface Lamination Assemblies?

Large surface bonds and laminations exist in multiple markets, such as transportation, appliance, furniture and construction.

Large Surface Lamination: Two surfaces (substrates) of similar size, either rigid or flexible, are bonded or laminated together where a majority of the surface is covered by the adhesive or tape in order to create the bond. **Examples include high pressure laminate to tabletops, fabric to foam for furniture, veneers on wood and flexible transportation flooring.**

Possible Adhesive or Tape Requirements:

- Cover full surface
- Flexible when dry; not stiff
- Allow for positioning parts
- Bonds quickly/little or no fixturing

Best 3M Solutions for Large Surface Lamination Assemblies

11

■ 3M™ Scotch-Weld™ Structural Adhesives (pg 18–34)

Acrylic, epoxy and urethane structural adhesives that hold over 1,000 psi in overlap shear strength. Best suited for applications where high load-bearing strength is required.

14

■ 3M™ Contact and Spray Adhesives (pg 52–63)

Solvent and water based adhesives that can be sprayed, brushed or roll applied. Very fast and easy coverage of large areas including irregular and mildly textured shapes. Bonds the widest range of substrates.

17

■ 3M™ Hot Melt Adhesives (pg 45–51)

100% solid, low VOC thermoplastic resins that reach bond strength in seconds. Long open-time formulations can be spray applied. Bonds irregular shapes and textured surfaces.

21

■ 3M™ Scotch-Weld™ PUR Adhesives (pg 35–37)

One component, hot applied thermosetting adhesive with immediate strength and holding power. Final cured strength over 1,000 psi. Long open-time formulations can be spray applied.

13

■ 3M™ Adhesive Transfer Tapes (pg 87–92)

A pressure sensitive adhesive on a liner. Can be laminated onto a surface by hand or by automation. Instant adhesion with no mess or waste and very thin bondlines.

Performance Factors for Large Surface Lamination Assemblies

36

This guide lists products that are commonly used for this specific application. It is important that the customer evaluates these suggested products in their specific application.

What are Mounting and Trim Attachment Assemblies?

Mounting and trim attachment exists in multiple markets, such as transportation, appliance, furniture, construction and architecture.

Mounting: Applying an object to a surface. Generally, static loads are prevalent and the mounted item is smaller than the surface to which it is bonded. **Examples include small signs, mirrors and white boards, and panel-over-panel with partial adhesive coverage.**

Trim: Decoration or identification added to a surface. **Examples include nameplates, edge banding, bezels, rosettes and muntin bars.**

Possible Adhesive or Tape Requirements:

- Dead load holding strength
- Aesthetics
- Removability
- Fast bonding/little or no fixturing

Best 3M Solutions for Mounting and Trim Attachment Assemblies

■ 3M™ VHB™ Tapes (pg 72–79)

High-strength bonding tapes that are a proven alternative to screws, rivets, welds and other mechanical fasteners. Can pre-apply to trim for production flexibility. Ideal for dissimilar substrates.

■ 3M™ Scotch-Weld™ Structural Adhesives (pg 18–34)

Acrylic, epoxy and urethane structural adhesives that hold over 1,000 psi in overlap shear strength. Use for heavy dead loads with smaller joint areas (Example: brackets on heavy panels, poorly matched parts with high spring-back forces).

■ 3M™ Scotch-Weld™ Instant Adhesives (pg 37–39)

One part solvent-free cyanoacrylate (CA) adhesive that reaches handling strength in 5–30 seconds. Best for small very tight bondlines (<10cm²). Commonly used on rubbers and plastics.

■ 3M™ Hot Melt Adhesives (pg 45–51)

100% solid, thermoplastic resins that reach bond strength in seconds. Best for wood and plastic.

■ 3M™ Scotch-Weld™ PUR Adhesives (pg 35–37)

One component, hot applied thermosetting adhesive with immediate strength and holding power. Final cured strength over 1,000 psi. Best for wood and plastic.

■ 3M™ Reclosable Fasteners (pg 96–99)

3M™ Dual Lock™ and 3M™ Hook and Loop Reclosable Fasteners for strong yet easily removable fastening solutions. These products are ideal for quick mounting, trim or sign installation and change out.

■ 3M™ Adhesive Transfer Tapes (pg 87–92)

A pressure sensitive adhesive on a liner. Can be laminated onto a surface by hand or by automation. Can be pre-applied to trim. Provides very thin, aesthetic bondlines. Special formulations for LSE plastics.

■ 3M™ Double Coated Tapes (pg 81–85)

A paper, film or tissue carrier with pressure sensitive adhesive on both sides. Can be laminated onto a surface by hand or by automation. Can be pre-applied to trim. Provides very thin, aesthetic bondlines. Special formulations for LSE plastics.

Performance Factors for Mounting and Trim Attachment Assemblies

All 3M technologies in the table below are commonly used in mounting and trim attachment applications.

Use the table below as a relative comparison of product performance.

For 3M™ VHB™ Tape applications in the Window and Door market, refer to page 78 for a selection of products.

This guide lists products that are commonly used for this specific application. It is important that the customer evaluates these suggested products in their specific application.

What are Gasket Attachment Assemblies?

Gaskets are used in multiple markets, such as electronics, transportation, fluid handling equipment and appliance.

Gasketing: Attachment of a substrate typically, foam, rubber or paper that acts as an interface or seal between two surfaces. 3M offers solutions for attaching preformed gaskets, and also solutions which can replace gaskets or bond and seal simultaneously. **Examples include air and liquid filters, fluid handling equipment, heat exchangers and ball joints.**

Possible Adhesive or Tape Requirements:

- Easy and fast to apply gaskets
- Resist fluids
- High adhesion to foams and rubber

Best 3M Solutions for Gasket Assemblies

■ 3M™ VHB™ Tapes (pg 72–79)

High-strength bonding tapes that can be die-cut into a variety of shapes to replace rubber or foam gaskets, providing an instant, simple solution. Their closed-cell construction provides a watertight barrier between flat parts.

■ 3M™ Scotch-Weld™ Instant Adhesives (pg 37–39)

One part solvent-free cyanoacrylate (CA) adhesive that reaches handling strength in 5–30 seconds. Best for small very tight bondlines (<10cm²). Commonly used on rubbers and plastics.

■ 3M™ Scotch-Weld™ Gasket Makers (pg 41)

One-part anaerobic adhesives can be applied as a curing liquid gasket between complex metal shapes, replacing pre-formed gaskets.

■ 3M™ Contact and Spray Adhesives (pg 52–63)

Solvent and water based adhesives can be sprayed, brushed or roll applied. Very fast, easy and economical coverage of multiple substrates, irregular shapes and mild textures.

■ 3M™ Adhesive Transfer Tapes (pg 87–92)

Can be pre-applied to gasketing material which is then die-cut to provide parts. These products provide instant adhesion to flat, untextured substrates.

■ 3M™ Double Coated Tapes (pg 81–85)

Can be pre-applied to gasketing material which is then die-cut to provide parts. These products provide instant adhesion.

What is Sealing of Assemblies? What is Potting and Encapsulating of Assemblies?

Sealing and potting exists in multiple markets, such as transportation, metalworking, electronics, electrical, construction and MRO.

Sealing: Tape or sealant is applied over a seam to prevent fluid ingress or fluid egress. **Examples include roof seams on vehicles, seams on metal enclosures and pipe sealing.**

Potting and Encapsulating: Adhesive flows over and around a component or fills in a chamber to protect components therein. **Examples include heavy duty electrical cords and connectors, electronics in plastic cases, circuit boards and concrete repair.**

Possible Adhesive or Tape Requirements:

- Highly elongating/flexible
- Fast cure for painting
- Durability

Best 3M Solutions for Sealing, Potting and Encapsulating

■ 3M™ Scotch-Weld™ Structural Adhesives (pg 18–34)

Acrylic, epoxy and urethane structural adhesives are available in a variety of cure times and flow profiles for potting and encapsulation. Available in both rigid and flexible formulations.

■ 3M™ Hot Melt Adhesives (pg 45–51)

Extrudable, 100% solid, thermoplastic resins designed for potting and encapsulating electrical components.

■ 3M™ Adhesive Sealants (pg 64–68)

Acrylic, polyurethane and nitrile and hybrid are one component sealing technologies. Can be extruded in any shape on a substrate and are non-sag to fill gaps. Some formulations can be painted wet.

■ 3M™ Extreme Sealing Tapes (pg 80)

Provides instant sealing and paint-ability when applied over seams or gaps. Conformable over rivets.

Performance Factors for Sealing, Potting and Encapsulating

All 3M technologies in the table below are commonly used in sealing, potting and encapsulation applications.

Use the table below as a relative comparison of product performance.

Good = + Better = ++ Best = +++

| Attribute | 3M™ Scotch-Weld™ Structural Adhesives | 3M™ Hot Melt Adhesives | 3M™ Adhesive Sealants | 3M™ Extreme Sealing Tapes |
|---------------------------|---------------------------------------|------------------------|-----------------------|---------------------------|
| Sealing | Flexibility | N/A | N/A | +++ |
| | Ease of Application | N/A | N/A | +++ |
| | Time to Paint (or handle part) | N/A | N/A | + |
| | Immediate Rework | N/A | N/A | ++ |
| Potting and Encapsulating | Temperature and Solvent Resistance | +++ | ++ | + |
| | Time to Paint (or handle part) | ++ | +++ | + |
| | Flowability* | +++ | ++ | + |
| | Adhesion to Substrates | +++ | ++ | + |

*3M™ Scotch-Weld™ Structural Adhesives and 3M™ Hot Melt Adhesives are used for potting and encapsulating where their flow and conformability allow them to fill into, or dome over, complex shapes. 3M™ Adhesive Sealants are thick and can be dispensed into wide vertical or horizontal gaps, as well as over seams. 3M™ Extreme Sealing Tape seals over seams and narrow gaps but does not flow into gaps. It can conform over low profile objects such as rivet heads.

This guide lists products that are commonly used for this specific application. It is important that the customer evaluates these suggested products in their specific application.

Substrates and Adhesion — A Surface Phenomenon, So Know Surfaces Well.

Adhesive attaches to the surfaces of two substrates, unlike a process that fuses the substrates into a unified whole such as welding or solvent activation of plastics. When selecting a 3M adhesive or tape, surface condition must be considered: roughness, smoothness, porosity, coated, uncoated, cleanliness, flexibility size of part and surface energy of part.

Adhesive paste, for example, flows readily into a rough surface for improved effective adhesion. Flexible materials such as paper or thin gauge metal can be bonded with thin adhesive transfer tape. Large rigid parts with smooth clean surfaces can be bonded with a variety of 3M product ranging from double-coated foam tapes to two-part structural adhesives. Some plastics have plasticizers which migrate to the surface and degrade the bond over time, so plasticizer-resistant adhesive or tape is essential. If the surface has been powder coat painted, the coating is the bonding surface rather than the substrate, and you would want to consider a 3M tape or adhesive developed specifically for the surface.

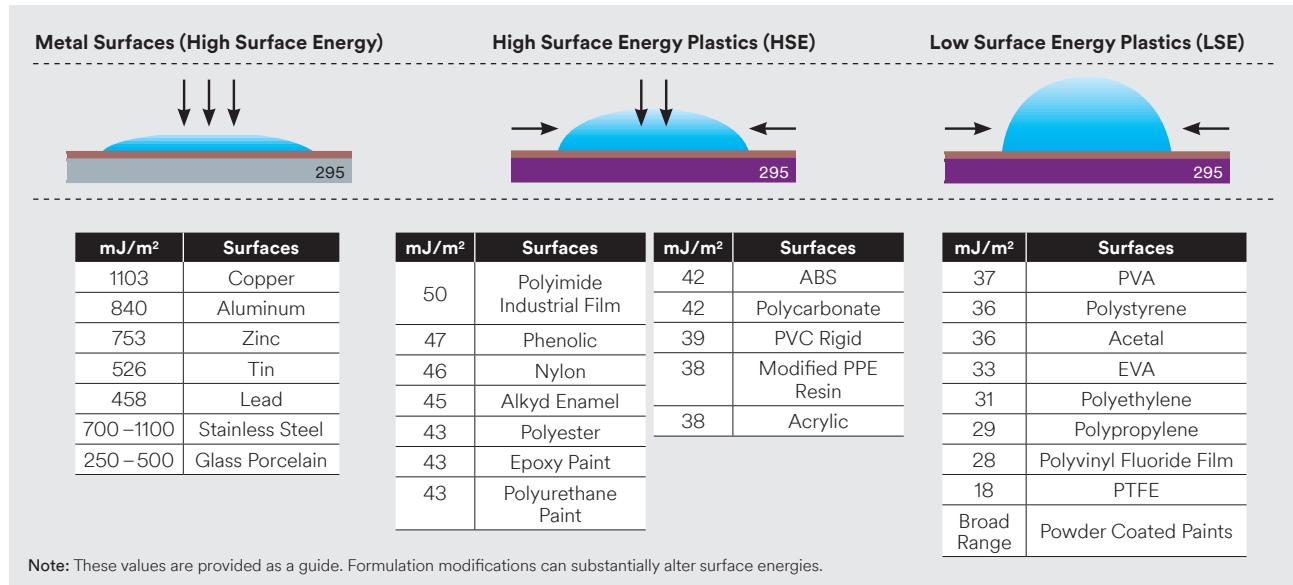

Surface energy ranges from high to low. To illustrate the concept of surface energy, think of water on an unwaxed hood of a car. The unwaxed hood has high surface energy and the water on the hood flows into puddles. In comparison, a waxed hood has low surface energy and the water beads up rather than flow out. Similar to water, adhesive on a high surface energy flows and “wets out” the surface. “Wetting out” is required to form a strong bond.

As a rule of thumb, the higher the surface energy, the greater the strength of the adhesion.

Specially formulated adhesives are available for low surface energy surfaces. The following illustrations and surface rankings give an idea of the relative surface energy.

Regardless of surface energy, the substrate must be unified, dry and clean to maximize adhesive contact.

Surface Energy Chart

Powerful Adhesive and Sealant Solutions

3M offers a wide range of innovative adhesives and sealants designed for industrial markets. High quality, precision formulations with proven performance provide reliable, long-term durability for a variety of applications, indoors and out.

Design with Confidence. Build to Last.

In today's world, successful new products demand advancements in design, manufacturing processes and end-use performance. Industrial engineering and design professionals around the world depend on 3M™ Scotch-Weld™ Structural Adhesives to help them design beyond the limits of mechanical fasteners to create next generation products.

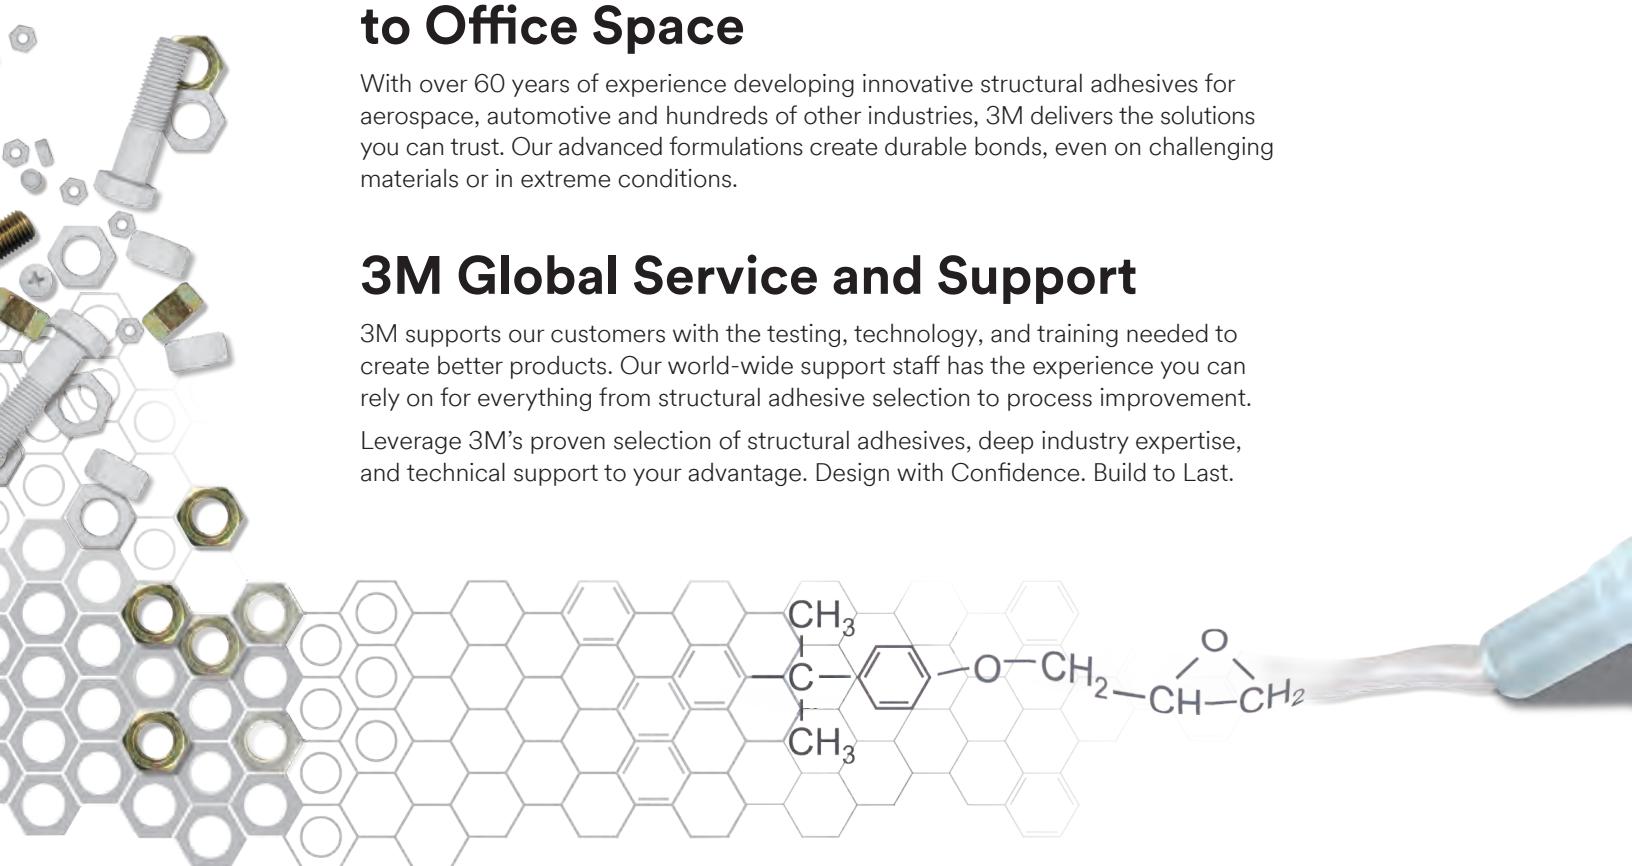

Trusted Innovations from Aerospace to Office Space

With over 60 years of experience developing innovative structural adhesives for aerospace, automotive and hundreds of other industries, 3M delivers the solutions you can trust. Our advanced formulations create durable bonds, even on challenging materials or in extreme conditions.

3M Global Service and Support

3M supports our customers with the testing, technology, and training needed to create better products. Our world-wide support staff has the experience you can rely on for everything from structural adhesive selection to process improvement.

Leverage 3M's proven selection of structural adhesives, deep industry expertise, and technical support to your advantage. Design with Confidence. Build to Last.

**3M™ Scotch-Weld™ Structural Adhesives
are Transforming the Way Engineers Think**

Advancing Design, Process and Performance

The benefits of designing and building products with 3M™ Scotch-Weld™ Structural Adhesives help drive product success. Eliminating mechanical fasteners provides a wide range of benefits for all stages of product development.

297

Design Solutions

Improve Aesthetics: Improve product appearance with invisible joints and smoother bond lines, reduce weight and noise, enhance corrosion and fatigue resistance, and more.

Freedom of Design: Join composites to metal, build with hard-to-bond plastics, and use thinner, lighter weight materials.

298

Process Efficiencies

Enhance Productivity: Reduce labor and material costs, build faster with minimal surface prep and match cure rates to your process needs.

Accurate and Easy: Dispense by hand or with automated equipment, and choose from a wide range of viscosities and flow rates.

299

Performance Optimization

Strong, Flexible Bonds: Adhesives bond and seal simultaneously, eliminate stress concentration and absorb shock and vibration for durable bonds.

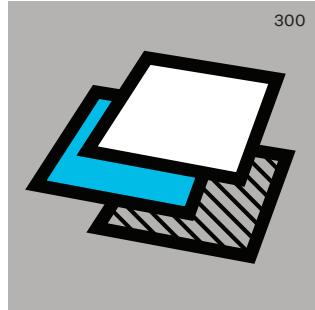

Increased Durability: Resist chemicals, environment, galvanic corrosion, fatigue, and material separation along edges or corners.

Simplifying Adhesive Decisions for Your Application

The following questions will help you narrow adhesive choices to a few possibilities for evaluation.

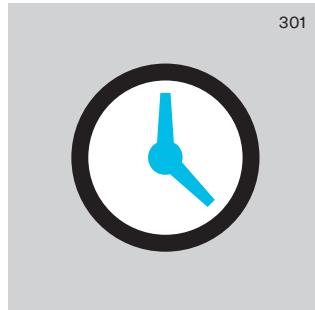

Q: What materials will be bonded?

A: Structural adhesives work by adhering to the top surface of the bonded parts, so it's important to know the exact material and condition on those surfaces. For metals, will the adhesive be applied to bare metal, or will there be a paint or coating on the surface? For plastics, exactly which base resin? Could there be residual release agents on the surfaces used for mold release?

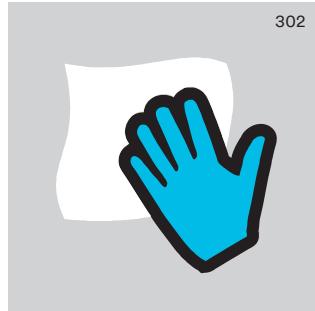

Q: What is the preferred cure speed?

A: The chosen structural adhesive must have enough work life (open time, pot life) to allow proper mixing and application of the adhesive and assembling of the bonded parts. Smaller assemblies or shorter cycle time production processes may be able to use a faster curing adhesive with a work life of only five minutes or less, while larger assemblies that require alignment and clamping will probably need a work life of 20 minutes or more.

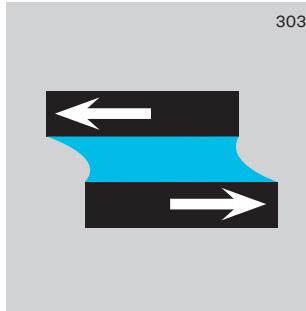

Q: What surface preparation will be required?

A: Structural adhesives generally prefer clean, rough, dry surfaces for highest bond strength. This typically means either light abrasion and solvent cleaning of the surface, or solvent cleaning followed by chemical etching or applying a primer. Adhesion tests should be performed to determine the adequate surface preparation for a specific application.

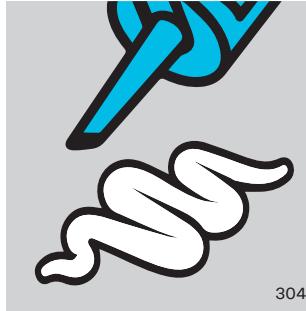

Q: What types of joints are best for structural adhesives?

A: Joint designs that put the adhesive bond under shear, tension, or compression forces will provide the highest strength. Designs that tend to apply peel or cleavage forces to the adhesive, where the applied stresses are not distributed over the entire bond area, will have lower bond strength, but the bond may still be sufficient for the needs of the application. In addition, optimum bond line thickness typically ranges from 0.005" to 0.020". The adhesive qualification process should always include testing of prototype assemblies to ensure the adhesive will provide enough performance.

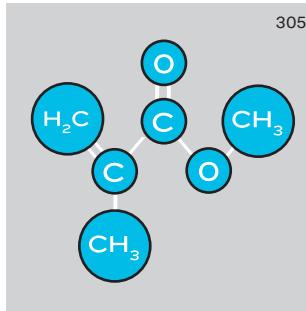

Q: How are structural adhesives used and applied?

A: Structural adhesives come in many forms, including low viscosity liquids and non-sag pastes, one- and two-component formulations, short and long work lives, and various package sizes and shapes. Most two-part structural adhesives are available in both bulk containers and convenient, easy-to-use cartridge mixing systems.

Q: What are the general characteristics of the different types of structural adhesives?

A: All structural adhesives provide at least 1,000 psi of overlap shear strength to aluminum, but the different adhesive chemistries have various properties.

Epoxy adhesives come in both two-part adhesives (that cure upon mixing the two components) and one-part adhesives (that cure with temperature). They generally have the highest strength and overall performance. They also provide the best resistance to high temperatures, solvents and outdoor weathering. They adhere well to metals, woods and concrete, and the flexible epoxy adhesives also bond to some plastics and rubbers. Epoxy adhesives usually require clean, abraded surfaces to obtain maximum bond strength.

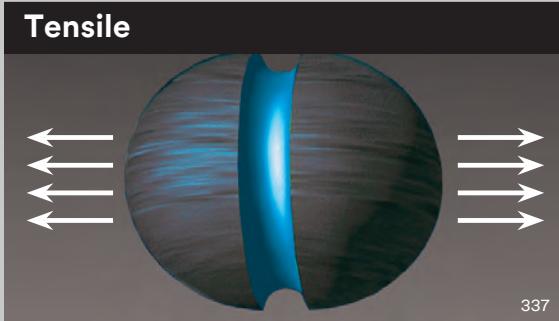

Acrylic adhesives are two-part adhesives that provide excellent bond strength and durability, although slightly lower than epoxy adhesives. However, they have several features that make them easier to use in many applications and manufacturing processes. These benefits include a much faster cure speed, higher tolerance for oily or unprepared bonding surfaces and the ability to bond a wide variety of materials, including nearly all plastics. Newer acrylic adhesive formulations are room temperature stable with a long shelf life, and some have much lower odor than regular acrylic adhesives.

Urethane adhesives are two-part adhesives that are relatively flexible when cured, and therefore tend to have excellent impact resistance and good adhesion to most plastics. They also bond well to woods, concrete and rubbers, but they tend to have reduced resistance to solvents and high temperatures. Uncured adhesive components are sensitive to moisture.

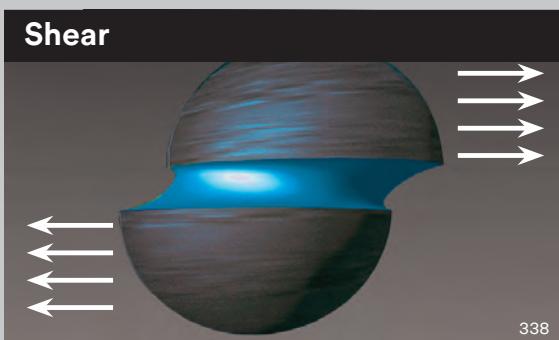

Cyanoacrylate adhesives (instant adhesives) are one-component, lower viscosity liquids that cure extremely quickly with just contact pressure and surface moisture. They adhere well, with thin bond lines, to plastics, metals and rubbers. With the use of primers, they can also adhere to low surface energy plastics and elastomers. They tend to have low flexibility, peel strength and impact resistance compared to other structural adhesives. They are generally used for applications such as gasket bonding and smaller assemblies.

Anaerobic adhesives are one-part adhesives that cure on active metal surfaces when oxygen gets excluded from the bond line. These products keep your factory running efficiently, reducing maintenance and leakage. They do not bond well to glass, plastics or rubbers, and are primarily used for applications such as locking threads and sealing pipe connections.

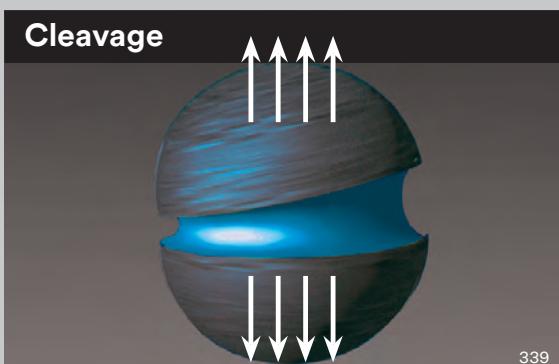

PUR adhesives (Polyurethane-reactive adhesives) are one-part adhesives that apply like a hot melt, but cure with ambient moisture for near structural strength bonds. Fast set times and build strength over the next 24–48 hours can reach as much as 1,000 psi in overlap shear strength. They are flexible and resistant to temperature extremes and most solvents. Most commonly used in bonds where at least one substrate contains or transmits moisture (such as wood or plastic).

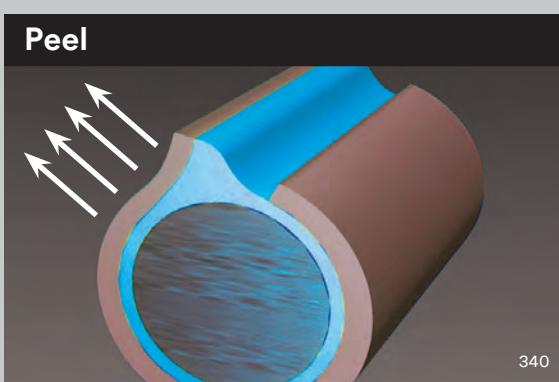

337
Tensile is pull exerted equally over the entire joint. Pull direction is straight and away from the adhesive bond.

338
Shear is pull directed across the adhesive, forcing the substrates to slide over each other.

339
Cleavage is pull concentrated at one edge of the joint, exerting a prying force on the bond. The other edge of the joint is theoretically under zero stress.

340
Peel is concentrated along a thin line at the edge of the bond where one substrate is flexible.

Key markets and applications for 3M™ Scotch-Weld™ Structural Adhesives

Sporting Goods

Key Features and Benefits

- Excellent impact resistance of high stressed bonds
- High strength for small joints
- High strength bonding of rubber, composites and metals to each other

78

79

Key Products

DP420NS Black, DP8810NS, PR100, TS230

Specialty Vehicle

Key Features and Benefits

- Weight reduction
- High strength
- Vibration and fatigue resistance

75

76

Key Products

DP6330NS, DP8410NS, LSB60NS, TL42

Signage

Key Features and Benefits

- One adhesive to bond all of your substrates
- Strong formulations and thin bond lines
- Weather resistance
- UL recognition

72

73

Key Products

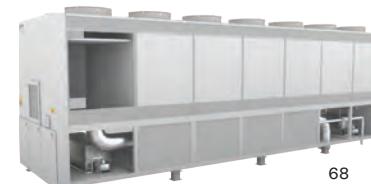

DP8805NS, DP8405NS, DP100 Plus

Metalworking

Key Features and Benefits

- High strength and durability
- Reduced surface preparation before bonding, and no grinding after bonding
- Save weight and improve appearance with adhesives instead of welds or rivets

35

68

Key Products

DP420NS Black, DP8407NS, DP8410NS

Electronics

Key Features and Benefits

- Excellent impact resistance of high stressed bonds
- High strength for small joints
- High strength bonding of rubber, composites and metals to each other

Key Products

DP420LH Black, DP8805NS, PR100, TS230

Appliance

Key Features and Benefits

- Simplify operations by bonding after powdercoating
- Eliminate the challenge of bonding rigid to flexible substrates
- Noise damping
- Reduce complexity-bond and seal glass to metal in one step

Key Products

DP125 Gray, DP6310NS, DP8810NS, TS230, TL42

Aerospace

Key Features and Benefits

- Available in UL94 or FST compliant options
- Strong, yet flex

Key Products

2216 Gray, DP100FR, DP640, TL71

Plastic, Composite & Rubber

Key Features and Benefits

- Bonding of low surface energy plastics without priming
- Impact resistant composite bonding

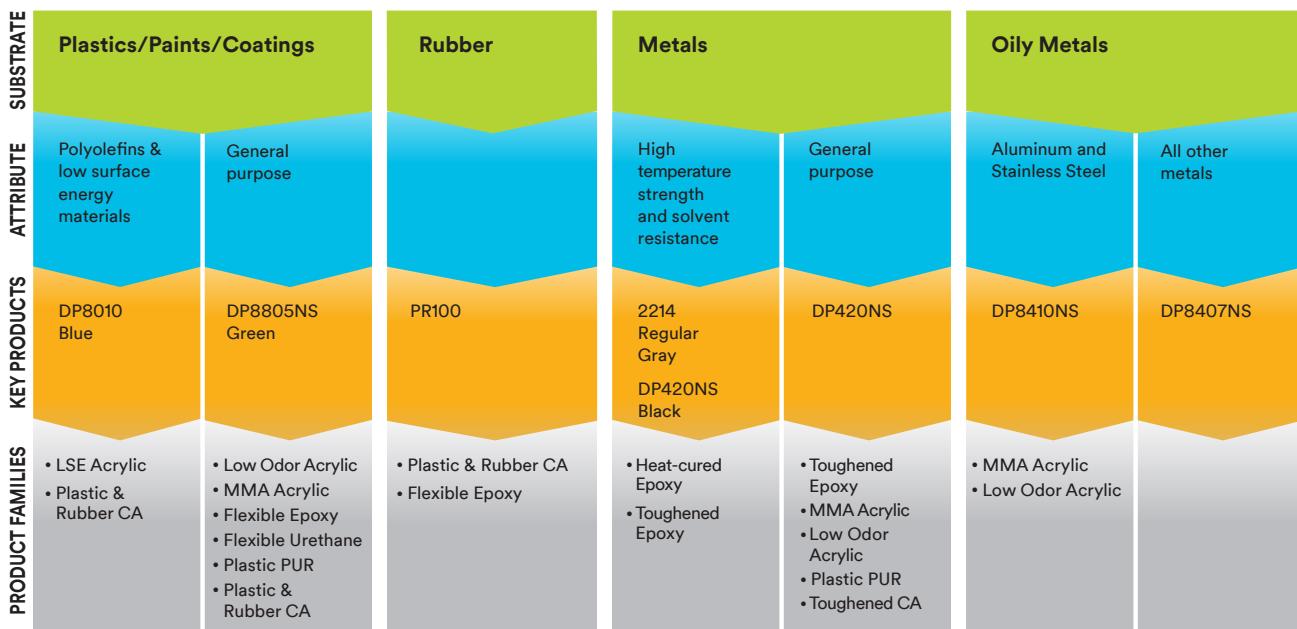

Key Products

**DP8010 Blue, DP420NS,
DP6310NS, TS230, PR100**

3M™ Scotch-Weld™ Adhesives Selector Guide

Step 1: Select Most Difficult Substrate **Step 2:** Determine Key Attribute **Step 3:** Select Product Family

*See chart in back of guide for more details.

SUBSTRATE ATTRIBUTE KEY PRODUCT PRODUCT FAMILIES

Structural Adhesive Families

Rigid Epoxy Adhesives — Higher tensile strength at lower elongations for greater long-term holding power. Mostly used for rigid substrates (metals) with high static loads.

Flexible Epoxy Adhesives — Lower tensile strength at higher elongations for greater capability to withstand differential movement of bonded parts; higher peel strength and higher adhesion to most plastics.

Toughened Epoxy Adhesives — Higher tensile strength at lower elongations for fatigue resistance; best suited for dynamic stresses. They have long-term holding power, higher peel strength, and exceptional higher resistance against shock, vibration and impact loads. Lower adhesion to most thermoplastics.

Heat-cured Epoxy Adhesives — One-component, rigid adhesives with outstanding strength at elevated temperatures. These adhesives require a thermal cure, typically around 250–350°F (120–180°C) for 40–60 minutes.

MMA Acrylic Adhesives — Provides greater adhesion to a wide variety of materials including most plastics and paint systems, are tolerant of many surface contaminations. High impact resistance for metal bonds.

Low Odor Acrylic Adhesives — Less odor than typical acrylic adhesives and faster rate of strength build than most two-part structural adhesives. Excellent adhesion to a variety of materials, including plastics and paint systems. They provide high impact resistance for plastic bonds; and are tolerant of many surface contaminations.

LSE Acrylic Adhesives — Outstanding adhesion to polyolefin materials such as polypropylene, polyethylene and TPO without surface treatment.

Semi-rigid Urethane Adhesives — Higher tensile modulus and lower elongation capability, with greater long-term holding power.

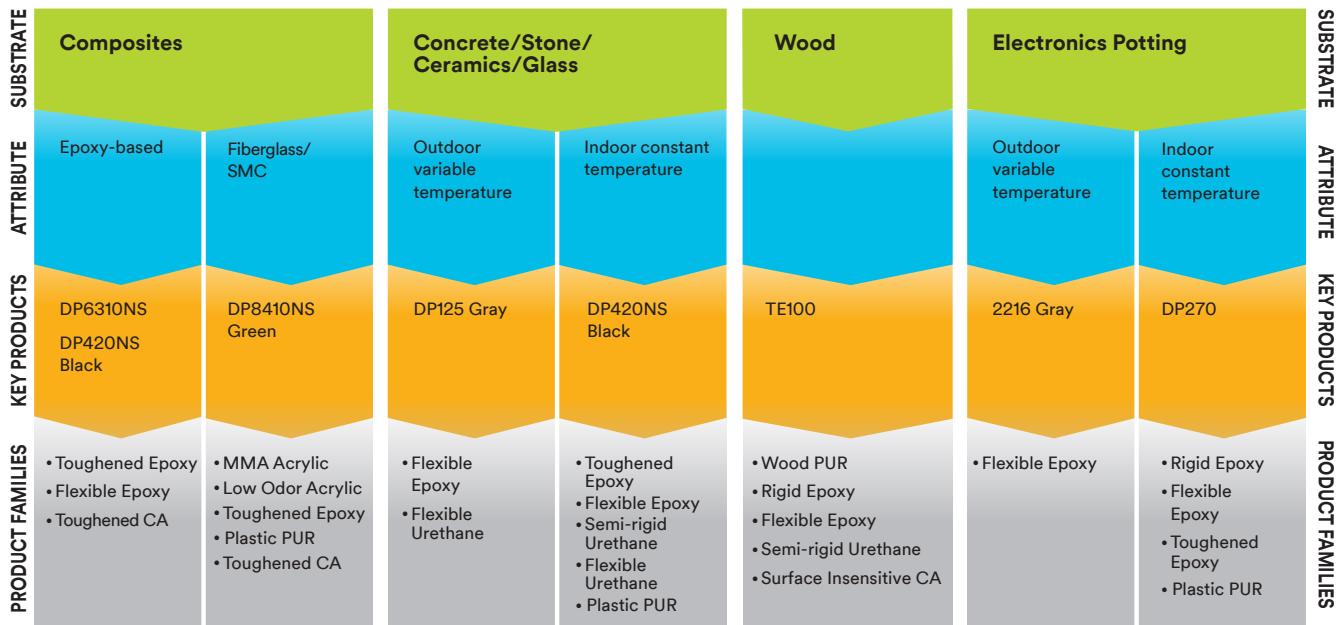

Flexible Urethane Adhesives — Lower tensile modulus and higher elongation capability. Excellent adhesion to most plastics.

Instant Adhesive Families

Plastic & Rubber (PR) Instant Adhesives bond to the widest variety of materials, have an extremely fast cure speed, and come in a wide range of viscosity.

Surface Insensitive (SI) Instant Adhesives cure even on acidic surfaces (such as wood, paper, leather, and ceramic); these adhesives have a slower cure speed than traditional instant adhesives.

Step 1: Select Most Difficult Substrate **Step 2: Determine Key Attribute** **Step 3: Select Product Family**

*See chart in back of guide for more details.

SUBSTRATE **ATTRIBUTE** **KEY PRODUCT** **PRODUCT FAMILIES**

Low Odor (LO) Instant Adhesives provide a reduced blooming effect for applications that require an improved appearance.

General Purpose (EC) Instant Adhesives are slightly less expensive products that have lower strength and impact resistance compared to traditional instant adhesives.

Super Fast (SF) Instant Adhesives provide the fastest rate of cure speed for most applications.

Rubber Toughened (RT) Instant Adhesives can be used for applications that require improved impact strength or vibration resistance; preferred for applications bonding two rigid materials together.

Metal (MC) Instant Adhesives provide improved performance on metal substrates.

Engineered Grade (EG) Instant Adhesives provide excellent overall performance for most applications.

Anaerobic Adhesive Families

Threadlockers (TL) hold screws and other threaded fasteners in place to prevent loosening from shock, vibration, and thermal expansion and contraction; these adhesives replace lock washers and nylon-insert nuts.

Retaining Compounds (RT) bond and seal non-threaded cylindrical metal assemblies, such as press-fit or slip-fit parts; these adhesives replace keys, splines, and set screws.

Pipe Sealants (PS) provide a pressure seal on threaded tubes and pipes; these adhesives replace various tapes and pastes.

Gasket Makers (GM) fill voids between metal parts to create a form-in-place gasket; these adhesives replace o-rings and pre-formed gaskets.

PUR Adhesive Families

Wood PUR — Higher shear strength at lower elongations for long term holding power. Mostly used for rigid wood substrates and some plastics.

Plastic PUR — Higher impact strength, elongation and flexibility for greater capacity to withstand movement of bonded parts. Higher adhesion to most plastics, glass and aluminum.

3M™ Scotch-Weld™ Threadlockers

3M's Threadlocker Adhesives offer a range of products including temporary, permanent and high temperature resistance. These adhesives conform to most industry recognized standards for torque and strength.

Key Products
TL42, TL62, TL71, TL90

3M™ Scotch-Weld™ Epoxy Adhesive DP100 Plus

3M™ Scotch-Weld™ Epoxy Adhesive DP100 Plus is a very flexible, fast-setting, two-part epoxy adhesive that cures clear and colorless. It provides a strong, permanent bond, even under vibration and impact and is flexible when cured, making it a good choice for bonding dissimilar surfaces.

3M™ Scotch-Weld™ Low Surface Energy (LSE) Plastic Bonding Adhesives

3M's Low Surface Energy Structural Acrylic Adhesives bond to low surface energy plastics such as Polypropylene (PP), Polyethylene (HDPE) and most Thermoplastic Polyolefins (TPOs), providing structural adhesive bond strength that causes the plastic material to fail before the adhesive bond.

3M™ Scotch-Weld™ Low Odor and MMA Acrylic Adhesives

3M's Low Odor and MMA Acrylic Adhesives are designed for all of your sign application needs. They provide excellent impact strength, high peel strength and greatly extended shelf life compared to ordinary structural adhesives. With high structural strength, fast cure and environmental resistance, they are the first choice for the sign industry.

| 3M™ Scotch-Weld™ Instant Adhesives — Engineered Grade | | | | | | | | |
| CA4 | Fast setting for a variety of plastics and rubbers | 150 | -65° to 180°F (-54° to 82°C) | 5–40 sec | 24 | 2g tube 1 oz bottle 1 lb. bottle | 00-021200-96601-9 00-021200-96600-2 00-021200-96597-5 | 7010366320 7000028586 7000028587 |
| CA5 | Higher viscosity, slower setting version of CA4 for filling gaps, Meets CID A-A-3097, Type II, Class 3 | 2,000 | -65° to 180°F (-54° to 82°C) | 12–60 sec | 24 | 1 oz bottle 1 lb. bottle | 00-021200-74289-7 00-021200-74288-0 | 7000046524 7010367474 |
| CA7 | Very fast setting, Excellent metal bonder, Better shock and impact resistance | 15–40 | -65° to 212°F (-54° to 100°C) | 1–30 sec | 24 | 1 oz bottle 1 lb. bottle | 00-021200-21061-7 00-021200-21062-4 | 7000121352 7000121353 |
| CA8 | Rapid setting, Excellent adhesion to metals, plastics and rubbers, Meets CID A-A-3097, Type II, Class 2 | 70–130 | -65° to 180°F (-54° to 82°C) | 5–40 sec | 24 | 2g tube 1 oz bottle 1 lb. bottle | 00-021200-21065-5 00-021200-21066-2 00-021200-21067-9 | 7000121354 7000046526 7000046527 |
| CA9 | Slower setting for parts alignment, Useful for wire tracking and coil terminating, Meets CID A-A-3097, Type II, Class 3 | 1,000–1,700 | -65° to 180°F (-54° to 82°C) | 20–70 sec | 24 | 1 oz bottle 1 lb. bottle | 00-021200-21068-6 00-021200-21069-3 | 7000046528 7010299373 |
| CA40 | Very fast setting, Excellent adhesion to many substrates including flexible vinyl and EPDM rubber | 20 | -65° to 180°F (-54° to 82°C) | 3–20 sec | 24 | 1 oz bottle 1 lb. bottle | 00-021200-74290-3 00-021200-74291-0 | 70000000893 70000000894 |
| CA40H | Higher viscosity version of CA40, Better void filling capabilities | 400–600 | -65° to 212°F (-54° to 100°C) | 5–40 sec | 24 | 1 oz bottle 1 lb. bottle | 00-021200-21073-0 00-021200-21074-7 | 70000000895 70000000896 |
| CA50 Gel | High-viscosity, non-sag gel, Less sensitive to acidic surfaces | 45,000–85,000 | -65° to 212°F (-54° to 100°C) | 60–120 sec | 24 | 20g tube 200g cart. | 00-021200-82332-9 00-021200-83737-1 | 71000002517 70000000899 |
| CA100 | High peel and impact strength, shock and heat resistance | 2,500–4,500 | -65° to 212°F (-54° to 100°C) | 20–70 sec | 24 | 1 oz bottle 1 lb. bottle | 00-021200-82334-3 00-021200-82335-0 | 70000000900 70000000901 |

3M™ Scotch-Weld™ Instant Adhesives (cont.)

292

| Product (Color) | Key Features | Typical Viscosity (cP) | Time to Handling | Full Cure (Hr) | Size | UPC | Stock # |
|---|---|---------------------------|---------------------|----------------|--|---|--|
| 3M™ Scotch-Weld™ Instant Adhesive Primers & Activators | | | | | | | |
| AC09 | Instant adhesive activator, Non-flammable, solvent-based, California compliant | 1 | 1–5 sec | 24 | 2 fl oz bottle | 00-051111-07795-5 | 7010366543 |
| AC77 | Instant adhesive primer for bonding of difficult-to-bond plastics such as polyethylene, polypropylene and polyacetal | <3 | 1–5 sec | 24 | 2 fl oz bottle 1 gal can | 00-048011-62728-1 00-638060-40067-8 | 7100039260 7100190206 |
| AC79 | Instant adhesive primer for bonding of difficult-to-bond elastomers such as silicone, fluoroelastomer and EPDM, VOC compliant | 2 | 1–5 sec | 24 | 2 fl oz bottle 8 fl oz bottle 4L can | 00-051115-31388-2 00-051115-31389-9 00-051115-31390-5 | 7100039262 7100039264 7100039265 |
| AC113 | Instant adhesive general purpose accelerator, Will not attack plastics | <3 | 1–5 sec | 24 | 8 fl oz bottle | 00-048011-62682-6 | 7100079891 |
| AC452 | Instant adhesive acetone-based accelerator flashes off rapidly, Excellent adhesion, Overspray may attack some plastics | <2 | 1–5 sec | 24 | 8 fl oz bottle 4L can | 00-048011-62686-4 00-048011-62689-5 | 7010295349 7010366542 |
| Surface Activator | Clear, colorless organic-based liquid helps speed curing and prime surfaces, Comes with brush and spray pump | <10 | 1–5 sec | 24 | 2 fl oz bottle | 00-021200-87937-1 | 7000046525 |

SURFACE PREPARATION

3M™ Scotch-Weld™ Plastic and Rubber Instant Adhesives

3M's Engineered Grade Instant Adhesives combine high performance, excellent adhesion and temperature resistance with the speed of instant adhesives — providing you with differentiated capabilities for your most difficult thin bond line applications.

Key Products

CA5, CA40, CA40H, CA50 Gel

83

3M™ Scotch-Weld™ Engineered Grade Instant Adhesives

The PR (Plastic & Rubber) series of products bonds to most plastics and rubbers with a range of viscosities that will fit all your application needs. Just a single drop per square inch bonds several thousand pounds of holding power. They provide proven, world record strength with a hold of 8 metric tons.

Key Products

PR40, PR100, PR600, PR1500, PRGel

For low volume applications and take-it-to-the-job convenience, the 3M™ EPX Plus II and EPX Metal Manual Applicators comfortably dispense any of the 3M™ Scotch-Weld™ Duo-Pak Structural Adhesives. For higher volume applications, select the 200mL manual dispenser, or the 200mL or 400mL pneumatic dispenser. For concrete repair, there are both manual or pneumatic options.

3M™ Scotch-Weld™ One-Part Heat Cured Epoxies require a unique manual or pneumatic dispenser, such as Semco® 250, 350, 850, 950, or equivalent.

3M™ Scotch-Weld™ Structural Adhesives Surface Preparation Tips

The following surface preparation steps are generally recommended for most substrates and structural adhesives. See Technical Data Sheets for more specific recommendations.

METALS

1. Safely wipe surface with acetone or methyl ethyl ketone (MEK) using a clean cloth. A heavier degreaser may be needed if the substrate contains a layer of processing oil.
2. Lightly abrade surface with sandblasting, fine grit sandpaper or 3M™ Scotch-Brite™ 7447 maroon pads.
3. Wipe surface with acetone or MEK to remove debris.
4. Allow surface to dry before applying adhesive.

PLASTICS & RUBBERS

1. Lightly abrade surface with sandblasting, fine grit sandpaper or 3M™ Scotch-Brite™ 7447 maroon pads.
2. Wipe surface with isopropyl (IPA) alcohol using a clean cloth to remove debris.
3. Allow solvent to evaporate before applying adhesive.

GLASS

1. Wipe surface using a clean cloth with solvent containing 0.5 wt % silane adhesion promoter or wipe with 3M™ Scotch-Weld™ Metal Primer 3901.
2. Allow solvent to evaporate before applying adhesive.

3M™ Hot Melt Adhesive Selector Guide

Step 1: Select your assembly type.

Small Joint Assembly

Small joints are typically irregularly shaped, but only a few inches of overlap area.

292

Large Surface Lamination

Two surfaces of similar size, either rigid or flexible, are bonded or laminated together where majority of the surface is covered by adhesive.

Mounting and Trim Attachment

Small objects are mounted or added to a large surface.

292

Sealing, Potting and Encapsulating

Adhesive flows over and around a component or fills a chamber to protect and seal components therein.

Step 2: After selecting your assembly, choose the substrate and identify the adhesive that performs best for your application.

| Substrate | Wood | Paper | Plastic | Metal / Glass | Fabric / Foam |
|---------------|--------------------------------|----------------------------------|--------------------------------|--------------------------------|--|
| | 3M™ Hot Melt Adhesive 3792 | 3M™ Hot Melt Adhesive 3762LM | 3M™ Hot Melt Adhesive 3764 | 3M™ Hot Melt Adhesive 3747 | 3M™ Sprayable Hot Melt Adhesive 6111HT |
| Lead Adhesive | 3M™ Hot Melt Adhesive 3792 | 3M™ Hot Melt Adhesive 3762LM | 3M™ Hot Melt Adhesive 3764 | 3M™ Hot Melt Adhesive 3747 | 3M™ Sprayable Hot Melt Adhesive 6111HT |

Hot Melt Adhesive is dispensed at 350–385°F. Low Melt Adhesive is dispensed at 250–270°F.

NOTE: Low Melt (LM) adhesives liquefy at lower operating temperatures for bonding heat sensitive surfaces such as bead board and foams.

NOTE: High Temperature (HT) has high temperature resistance.

3M™ Hot Melt Spray Adhesives

292

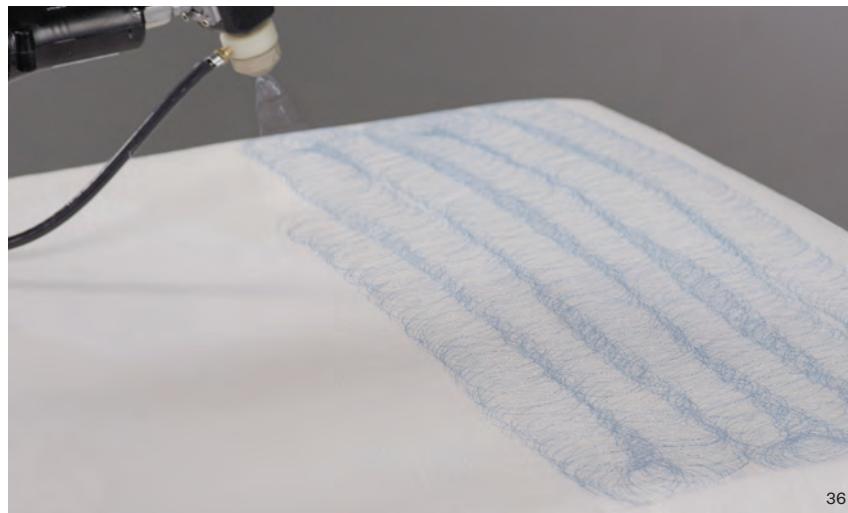

Immediate Bonding of Foam and Other Lightweight Materials

3M™ Hot Melt Spray Adhesive is a fast, effective alternative to solvent-based adhesives for bonding most foams, fabrics, plastics, wood and light-gauge metals. Applications range from furniture cushions to foam inserts, modular office panels to gym floor pads, and more. You simply spray a controlled pattern of 100% solids adhesive right where you want it. Apply to one or both surfaces and bond substrates immediately.

Other features include:

- Up to 10-minute open time for handling convenience and bonding larger areas
- Available in two colors to easily identify spray pattern*
- Bulk format adhesives for ease of use in most delivery systems

*See chart below.

36

Can bond multiple substrates, large surface areas with 1 or 2 surface applications.

118

In display cases for jewelry and other retail items, foam is bonded to foam and fabric. Low temperature spray will not damage heat-sensitive substrates.

119

In carrying case assembly, 3M™ Hot Melt Spray Adhesive bonds foam to foam, plywood, metal or plastic.

Adhesives Characteristics and Suggested Coverage

| Product Characteristics | 6111 | 6111 HT/6111 HT Blue | 6116 |
|--|----------------------|------------------------|---------------|
| Description | Standard Product | Higher Heat Resistance | Low Viscosity |
| Color | Tan | Tan/Blue | White |
| Open Time¹ One Surface (Foam/PVC) | 1 min | 3 min | 2 min |
| Open Time¹ Two Surface (Foam/Foam) | 6 min | 8 min | 6 min |
| Heat Resistance² | 145°F (63°C) | 175°F (79°C) | 160°F (71°C) |
| Peel Adhesion³ (PIW) | | | |
| Fir | 34.4 | 25.6 | 21.4 |
| ABS | 12.1 | 16.5 | 20.3 |
| Polypropylene | 46.3 | 14.4 | 16.4 |
| PVC | 9.9 | 16.3 | N/A |
| Cold Rolled Steel | 16.5 | 29.9 | 20.4 |
| High Density Polyethylene | 8.2 | 2.3 | N/A |
| Typical Coverage | | | |
| Two Surface Applications | Smooth Surface | Textured Surface | |
| | 1–2g/ft ² | 2–3g/ft ² | |
| One Surface Application | 3–5g/ft ² | 5–7g/ft ² | |

1 Bonds were made by spraying adhesive onto 3/4" thick, 2 lb. density polyester urethane foam. Open time will vary depending on substrate.

2 Tested per 3M IATD test method C-3093 using 2 lb. dead load.

3 According to 3M IATD test method C-3012. 180° peel strength was determined at a cross head speed of 2"/min at 73°F (23°C).

3M™ Hot Melt Adhesives and Applicators

The 3M Systems Approach to Help You Improve Productivity and Lower Costs

3M™ Hot Melt Adhesives and Applicators are advanced hand-held systems to help you improve productivity, lower cost and minimize waste.

Adhesives are 100% solids thermoplastic resins that become fluid when heated and quickly wet the bonding surface. They cool, harden and reach bond strength in seconds. You can move assemblies immediately to keep production flowing. This helps eliminate clamps, fixturing and drying, and saves time, energy and space.

Each adhesive is designed and precisely manufactured for efficient use in one of the portable 3M™ Hot Melt Applicators. Bonds wood, plastic, foam, fabric, cardboard and more.

120

3M™ Hot Melt Applicator LT with 3M™ Hot Melt Adhesive 3762LM low temperature (265°F/129°C) adhesive effectively bonds heat-sensitive substrates such as styrene foam to itself, corrugated or other surfaces without damaging the foam.

121

For bonding the guide to a drawer bottom, 3M™ Hot Melt Adhesive 3792 provides high delivery rate and long bonding range.

122

For sample and display boards, attach wood flooring, laminates, foams, fabrics or other materials and small products with 3M™ Hot Melt Adhesive 3792.

123

For economical package sealing, 3M™ Hot Melt Adhesive 3762 is a versatile formulation with a bonding range for production speed. Variety of tips for package types.

124

To help with sound dampening on drawer bottoms, use 3M™ Hot Melt Adhesive 3792.

125

3M™ Hot Melt Applicator LT and 3M™ Hot Melt Adhesive 3792LM applied at low temperature (265°F/129°C) make quick work of welting, gimping, and bonding fabric to wood.

126

For versatility in P.O.P. assembly, 3M™ Hot Melt Adhesive 3792 bonds a variety of plastics, woods and light gauge metals.

Selecting a 3M™ Hot-Melt Applicator to Fit Your Needs

127
3M™ Hot Melt Applicator LT. Low-medium volume using low melt adhesive.
UPC# 021200-82245

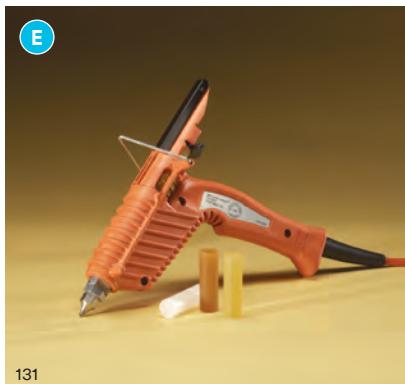

128
3M™ Hot Melt Applicator LT with Quadrack Converter. Medium volume using low melt adhesive.
UPC# 021200-89447

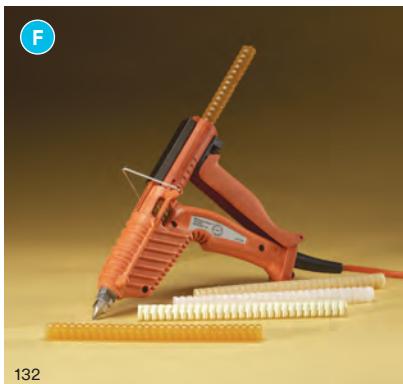

129
3M™ Pneumatic Hot Melt Applicator PG II LT with Speedloader. High volume using low melt adhesive.
UPC# 021200-89395

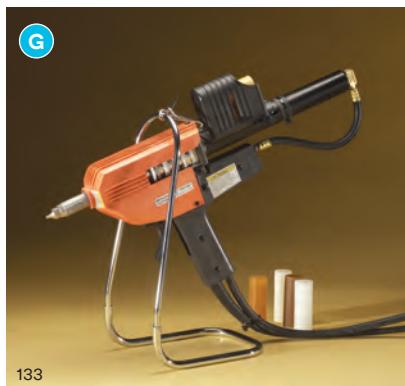

130
3M™ Hot Melt Applicator AE II LT. Low volume using low melt adhesive.
UPC# 051115-25567

131
3M™ Hot Melt Applicator TC. Low-medium volume.
UPC# 021200-82244

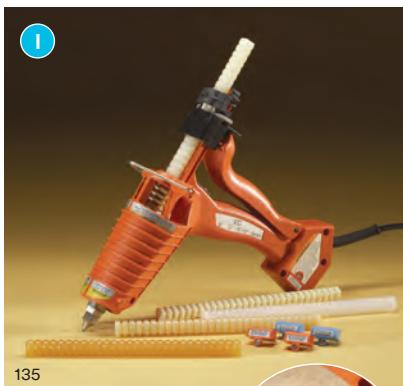

132
3M™ Hot Melt Applicator TC with Quadrack Converter. Medium volume.
UPC# 021200-89445

133
3M™ Pneumatic Hot Melt Applicator PG II with Speedloader. High volume.
UPC# 021200-22033

134
3M™ Hot Melt Applicator AE II. Low volume.
UPC# 021200-96594

135
3M™ Hot Melt Applicator EC. Medium volume; variable temperature control.
UPC# 021200-89519

3M™ Hot Melt Applicators

3M™ Hot Melt Adhesives

292

| Product | Color | UL 94 Listing | Features/Application Ideas |
|---|--------------|---------------|--|
| Low Melt Technology: Applied 250–270°F (121–132°C) | | | |
| 3762LM* | Light Amber | N/A | Excellent "hot tack", fast setting for corrugated, beadboard, recouperage, repacking chipboard and wood. Economical, general purpose. Use with low melt applicator only. |
| 3776LM | Tan | N/A | Bonds variety of plastics, woods and light-gauge metals. Use with low melt applicator only. |
| 3792LM* | Clear | V2 | Clear, multi-purpose for wood, coated paper, polyolefins and other heat-sensitive materials. P.O.P. displays. Use with low melt applicator only. |
| 3798LM* | Light Yellow | N/A | Removable "gummy glue" for many substrates. Removes easily without residual tack. Use with low melt applicator only. |
| Hot Melt Technology: Applied 350–385°F (177–196°C) | | | |
| 3731* | Tan | N/A | High heat resistance. Bonds plastics including polyethylene, polypropylene. |
| 3738* | Tan | V2 | High delivery rate and long bonding range. General purpose for foundry sand cores, wood bonding, corrugated, selected plastics and chipboard. |
| 3747 | Tan | N/A | General purpose for wide variety of plastics, wood and lightweight metals. |
| 3748* | Off-White | V2 | Good thermal shock resistance. Non-corrosive to copper for many electronic applications. Bonds polyolefins. |
| 3748 VO | Light Yellow | VO | Self-extinguishing version of 3748. Meets UL 1410 requirements. |
| 3750 | Tan | N/A | Low viscosity for high flow rate, increased production. Good hot tack, quick grab for packaging and woodworking. |
| 3750 | Clear | N/A | Low viscosity for high flow rate, increased production. Good hot tack, quick grab for packaging and woodworking. |
| 3762 | Tan | V2 | Excellent "hot tack", fast setting for corrugated, beadboard, recouperage, repacking chipboard and wood. Economical, general purpose. |
| 3764* | Clear | V2 | Bonds variety of plastics including polycarbonate, polyethylene, and polypropylene. Flexible at low temperatures. |
| 3779* | Amber | N/A | High heat resistance. High strength. Good fuel and oil resistance. Electronics. |
| 3789* | Brown | V2 | High performance for plastics. Impact resistant. Bonds vinyl and wood. Good fuel and oil resistance. |
| 3792* | Clear | V2 | Clear, multi-purpose for wood, corrugated, fabric, furniture, upholstery, novelties, and other lightweight materials. |
| 3797 | Off-White | V2 | High ball and ring. Low viscosity. Good for electrical potting. |
| Bulk Only | | | |
| 3794 Hi Tack PSA | Light Tan | N/A | Sprayable high tack PSA for bonding plastic, paper, metals, die-cut labels. |
| 6111 | Tan | N/A | Sprayable 100% solventless adhesive for most foams, fabrics, plastics, particle board and thin metal. |
| 6111HT | Tan, Blue | N/A | Similar to 6111 but has higher heat resistance. Available in tan and blue. |
| 6116 | Off-White | N/A | Similar to 6111 but lower than normal viscosity and mainly used on fabrics. |

*Also available in bulk.

1 – Brookfield Thermosel Viscometer in Centipoise

2 – ASTM E-28-6-7

3 – Highest temperature that the adhesive will support a 2 psi dead load

4 – Canvas to Douglas Fir

5 – Douglas Fir to Douglas Fir

6 – 1/8" semicircular bead, Douglas Fir to Douglas Fir

Solvent and Water Based Adhesives

Unite Performance, Productivity and Sustainability

3M™ Solvent and Water Based Adhesives start with the customer. Their process, their requirements and their wishes. Then the 3M team of industry experts, in conjunction with our comprehensive technology portfolio, offers customers versatility, efficiency and confidence to answer their “what if?”

Performance

Find the **RIGHT** product for your assembly with the **RIGHT** questions:

- What substrates are being bonded?
- What are the issues with your current product?
- Are there any environmental Health and Safety requirements?
- Are there specific product attributes needed?
- Are there specific manufacturing requirements?
- What is the size of the substrate being sprayed?

Sustainability

Low Emissions. High Standards.

146

Going “green” does not mean that you have to give up on performance. For 40 years our engineers have been developing water-based, low VOC and GREENGUARD Certified adhesives that have been used in the most demanding applications.

**So, are you ready to go “green?”
We’re ready to take you there.**

Productivity

Our goal is to make your business as efficient and effective as possible. How the adhesive gets to your assembly is equally as important as the adhesive itself. We work with you to integrate the best delivery system for your process.

Cylinders

- Self-contained and pressurized
- Portable
- Minimal equipment investment
- Low maintenance
- Optimized spray pattern cuts waste and maximizes coverage

Aerosols

- Convenient for smaller jobs or multiple stations
- Easy to use and no equipment

Bulk

- Cost effective
- Integrate into existing equipment

Multipurpose Adhesives — Solvent and Water Based

292

Insulation, Light Fabrics, Cardboard and Other Light Duty Bonding

Those working with HVAC, General Industrial, Signage, Exhibit/P.O.P. and packaging can effectively bond insulation, light fabrics, cardboard and paper with these versatile adhesives.

- Insulation attachment (polystyrene*, fiber glass, foam, etc.)
- General assembly
- Temporary holding (third hand)
- P.O.P. displays
- Carton sealing, palletizing and label attachment

*Not all products are compatible with polystyrene

| MULTI-PURPOSE — Solvent Based Adhesives | | |
|---|-------------------------|-------------------|
| Product | Requirement | Size Availability |
| 70 | FAST TACKING | |
| 77 | Low soak in, mist spray | |
| 74NF | Non-flammable | |

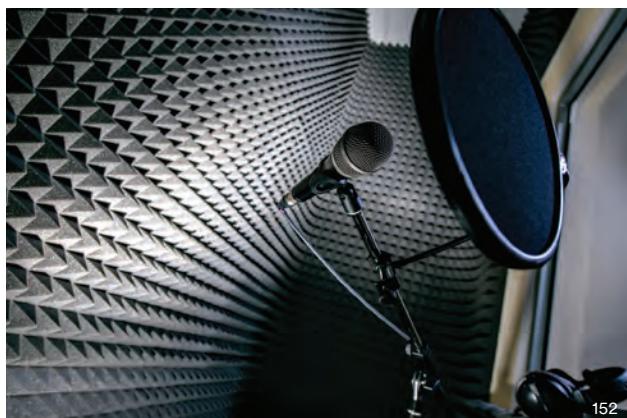

| MULTI-PURPOSE — Water Based Adhesives | | |
|---------------------------------------|--------------------------------|-------------------|
| Product | Requirement | Size Availability |
| 1000NF | ONE-SIDED BONDING | |
| 49 | Long open time, long tack time | |
| 100NF | Immediate bonding | |

Aerosol Cylinder Bulk

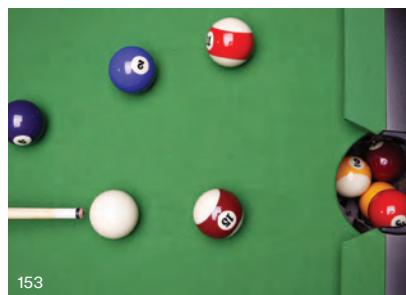

151

3M multipurpose adhesives are commonly used for installation of shoddy material, venting insulation and other foams and fabrics. Our product line offers the most versatility for adhesive delivery. 3M™ Super 77™ Multipurpose Spray Adhesive, for example, can be sprayed from bulk containers, cylinders or aerosol cans.

152

When thinking insulation, don't stop at heating and ventilation. In this application, our adhesives can be used for installation of foam for acoustical soundproofing.

153

154

159

The variety of applications for these multi-purpose adhesives is nearly endless. From adhering pool table felt, to building architectural models, and even bonding protective materials like dense foams into electronics, musical instrument or sensitive equipment cases. 3M has a spray adhesive solution to fit customers' needs.

Note: The technical information and data on these pages should be considered representative or typical only and should not be used for specification purposes.

Woodworking and Large Surface Lamination — Solvent and Water Based

292

Wood, Metal and Rubber Flooring

Woodworking, transportation, construction, and general industrial markets can effectively bond metals, wood, rubber, carpet and flooring (vinyl tiles) with this line of adhesives. Some applications include transportation flooring and carpet, store fixtures and furniture.

- High pressure laminate (HPL)
- Edge banding
- Countertops
- Furniture
- Display fixtures
- Specialty vehicle flooring
- Wood furniture
- Trade show displays

80

Marine and specialty vehicle applications, like installing carpet, rubber or synthetic flooring, are perfect for 3M sprayable adhesives. Our quick tack, low VOC and cylinder delivery are common benefits in this market.

| HEAVY DUTY — Solvent Based Adhesives | | |
|---|--|-------------------|
| Product | Requirement | Size Availability |
| 94 CA | FAST TACKING, POSTFORMABLE | |
| 90 | High strength | |
| 92 | High temperature resistance | |
| 94 ET | Longer open time, more aggressive tack | |
| 98 NF | Non-flammable | |
| 5 | Very high temperature resistance | |
| 1099 | Plasticizer resistance, harsh environments | |

| HEAVY-DUTY — Water Based Adhesives | | |
|---|--|-------------------|
| Product | Requirement | Size Availability |
| 30NF | HIGH STRENGTH | |
| 2000NF | Faster initial strength | |
| 1000NF | One surface bonding, fast assembly, plasticizer resistance | |

159

160

3M™ Hi-Strength 90 Spray Adhesive has a long reputation of holding strong in critical applications like this edge banding strip. Also, 3M has multiple adhesives that are postformable. Postforming is where the laminate is heated and bent as much as 360° around a radius.

Note: The technical information and data on these pages should be considered representative or typical only and should not be used for specification purposes.

Foam and Fabric Adhesives — Solvent and Water Based

Upholstery and Furniture

Users in the furniture manufacturing, upholstery, or transportation industry can rely on these adhesives to permanently bond open cell foam, closed cell foam and fabrics in a variety applications.

- Upholstered furniture and seating
- Headliners
- Office partitions
- General foam bonding

155

Foam and fabric applications can be very challenging. From soft bond lines to tight radii, our lineup can meet the demand. The 3M portfolio of water and solvent based adhesives truly give the customer “flexibility.”

| FOAM & FABRIC — Solvent Based Adhesives | | |
|---|-------------------------|-------------------|
| Key Product | Requirement | Size Availability |
| 100NF | SOFT BOND LINES | |
| 74NF | Non-flammable | |
| 77 | Low soak in, mist spray | |

| FOAM & FABRIC — Water Based Adhesives | | |
|---------------------------------------|---|-------------------|
| Key Product | Requirement | Size Availability |
| 100NF | HIGH COVERAGE | |
| 100NF + Activator | Faster initial strength | |
| 1000NF | One surface bonding, higher heat resistance | |

Aerosol Cylinder Bulk

156

Aerosol adhesives provide either web or mist spray patterns with higher solid content than our competitors. This combination allows 3M adhesives to sit on the surface versus soaking in. More adhesive on the surface results in less adhesive usage and a better bond for the customer.

157

These solvent and water based adhesives are often used as a “third hand” to hold lightweight materials in place until they can be sewn or held in place by other assembly methods.

High Performance Specialty Adhesives — Solvent and Water Based

Rubber and Plastic

Industrial, Automotive, and Military professionals can rely on these adhesives to effectively bond rubber, plastics and specialty composites.

- Sealing and gasketing
- Chemical resistance
- Unique environments
 - Harsh environments
 - MIL specs
 - Chemical resistance

43
In washing machine repair, 3M™ Neoprene High Performance Rubber and Gasket Adhesive 1300 bonds with high immediate strength and seals the doughnut seal in the outer tub.

| SPECIALTY — Rubber and Gasket Adhesives | | |
|---|--------------------------------------|-------------------|
| Product | Requirement | Size Availability |
| 1300 | NEOPRENE OR SBR BONDING | |
| 1300L | Sprayable, low viscosity | |
| 847 | Vinyl bonding, plasticizer resistant | |
| 4799 | EPDM bonding | |
| 80 | Aerosol | |

| SPECIALTY — Plastic Adhesives | | |
|-------------------------------|------------------------------------|-------------------|
| Product | Requirement | Size Availability |
| 1099 | RESISTS WATER, OIL AND PLASTICIZER | |
| 1099L | Sprayable, low viscosity | |
| 4693 | Polyolefin bonding | |
| 2262 | Clear drying | |
| 90 | Aerosol | |

161
With excellent resistance to fuel and oil, 3M™ Nitrile High Performance Rubber and Gasket Adhesive 847 bonds and seals chemical drum gaskets in place.

3M™ Cleaners and Lubricants

Convenience and a Fistful of Work Power for Maintenance and Production

In thousands of factories and plants, these aerosol chemicals are proven daily to save time and effort in maintenance and production. Lubricating, cleaning, inhibiting rust, and other tough jobs become finger-touch easy.

Compact container fits in a tool box to go readily to any job site and can help you reduce storage space and cost. With targeted application you get more usable product for your money.

3M aerosol chemicals contain no methylene chloride, chlorofluorocarbons (CFCs) or 1,1,1-trichlorethane (methyl chloroform).

164
3M™ Silicone Spray Low VOC 60% lubricates cutting tools and tables. Fast, easy application helps prevent buildup of adhesive, wax, inks and paints. Won't stain or become gummy.

165
For fast, easy cleanup of gears, 3M™ Industrial Citrus Base Cleaner helps soften and loosen grease, oil and grime. After using this heavy-duty degreaser/cleaner, just wipe away with a shop towel.

166
3M™ Adhesive Remover removes adhesive without damaging surface underneath.

MAINTENANCE AND CLEANING

| Product | Key Characteristics | Available Format | Color | Application Method | Spray Pattern | VOC Content |
|---------------------------------------|--|----------------------|-------------|--------------------|---------------|-------------|
| Adhesive Remover | Citrus based. Fast acting. No residue left behind. | 1 gal, 5 gal, 52 gal | Pale Yellow | Brush/Roll/Spray | Mist | 840g/L |
| | | 5 oz Aerosol | Pale Yellow | Spray | Mist | 100% |
| | | 18.5 oz Aerosol | Pale Yellow | Spray | Mist | 100% |
| | | Mini Cylinder | Pale Yellow | Spray | Mist | 800g/L |
| Adhesive Remover – Low VOC <20% Clear | Extended dwell time. No residual film. Meets CARB/OTC VOC Requirements. Helps contribute to LEED® credits. | Aerosol | Clear | Spray | Mist | 15% |
| Industrial Citrus Base Cleaner | Citrus based. Non-corrosive. Cleans oil, grease, tar and grime. | Aerosol | Transparent | Spray | Mist | 91% |
| Silicone Spray 60% VOC | Excellent lubricant. Fast drying. Long lasting and non-staining. | Aerosol | Clear | Spray | Mist | 60% |
| 5-Way Penetrant | Drives out moisture. Frees rusted bolts. Inhibits rust — lubricates, demoisturizes, inhibits corrosion, cleans and penetrates. | Aerosol | Amber | Spray | Mist | 30% |
| Silicone Lubricant | Excellent lubricant. Fast Drying. Long-lasting and non-staining. | Aerosol | Clear | Spray | Mist | 95% |

Note: The technical information and data on these pages should be considered representative or typical only and should not be used for specification purposes.

3M™ Cylinder Spray Adhesives

Efficient, Portable and Easy to Use

3M™ Cylinder Spray Adhesives have benefits over more traditional spray methods. Minimal startup costs, reduced downtime, simple hose and applicator setup make cylinders an obvious choice.

Whether your priorities are improving speed of application, making spraying easier or reducing capital equipment maintenance and other costs, 3M Cylinder Spray Adhesives get you there.

Advantages and benefits:

- Very efficient speed of application and reduction of overspray
- Convenient, portable and easy to use delivery system
- Maintenance free and very low equipment costs

Other benefits include:

- More efficient spraying over large surface areas or multiple parts means virtually all adhesive is used and very little is wasted
- Easy to learn, use and train new employees to spray
- Portable for easy transition and setup for multiple stations or field work

Key features include:

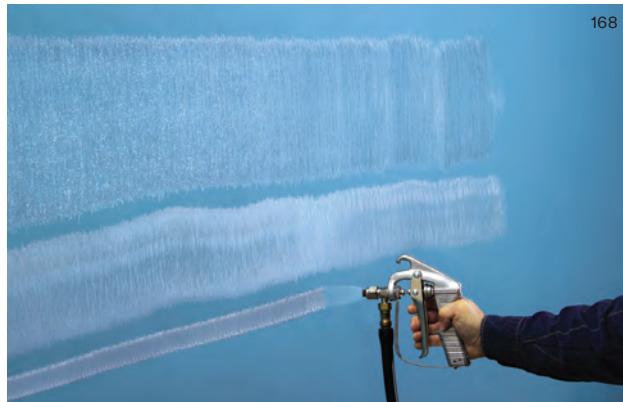

- High coverage
- Various spray patterns
- Non-flammable adhesives
- Greenguard Certified
- Range of open time (worklife)

146

167

168

Spray patterns from 1–18+" are achievable using 3M™ Cylinder Spray Adhesives and various spray tips.

Where to Start

Product Selection

The lead products for 3M™ Cylinder Adhesives are:

- 3M™ Postforming 94 CA Cylinder Spray Adhesive
- 3M™ Hi-Strength 94 ET Cylinder Spray Adhesive
- 3M™ Holdfast 70 Cylinder Spray Adhesive

The majority of applications can be done with these three cylinder products.

3M™ Postforming 94 CA Cylinder Spray Adhesive is a low telegraphing that dries quickly to reach postformable strength in 1–5 minutes. A 1–15 minute open time provides flexibility in assembly speed. 3M™ Hi-Strength 94 ET Cylinder Spray Adhesive offers all the benefits of 3M™ Postforming 94 CA Cylinder Spray Adhesive, but delivers a higher tack and increased bonding range.

For fast, easy foam board installation, above and below grade, simply spray and stick with 3M™ HoldFast 70 Cylinder Spray Adhesive. Bonds foam to concrete, waterproofing, OSB and more without damaging the foam.

Save Yourself the Hassle of Inefficient Spraying

Most common applications:

- High pressure laminate
- Foam/paper core steel door
- Upholstery
- Metal lamination
- Insulation bonding

Where to find these applications:

- Cabinet shops
- Elevator interiors
- Countertop shops
- Exhibit manufacturing
- Fixture/display manufacturing
- Office furniture
- Theatre/production sets
- Acoustic panel/partition

Key Questions

Asking the right questions related to the application will help you arrive at an adhesive selection quickly and painlessly.

Use A.S.P.E.C.

- What is the **APPLICATION** you are currently using the adhesive for?
- What **SUBSTRATES** does the adhesive need to bond too?
- Are there special **PROCESS** details the adhesive needs to accommodate? Such as high temperatures or VOC regulations?

- What kinds of **END USE** stress or environment will the bond be subject to? (e.g., boat carpet and saltwater conditions or exterior applications).
- How do you determine the **VALUE** beyond simply the **COST** of a product? (e.g., Improved coverage, reduced flammability or speed of application).

171

3M™ Cylinder Spray Adhesives do not atomize spray patterns with added airline. This means you get consistent even spray patterns, potentially saving rework and cleanup.

172

Consistent spray patterns and portable cylinders mean you can realize big improvements in efficiency and save time and labor costs.

3M™ Cylinder Spray Adhesive Quick Reference Guide

| Product | Application | Solids (%) | Solids – Bulk (%) | VOCs (g/L) | Open Time (min) | Spray Pattern | Spray Applicator | Recommended Tips |
|--------------------------|---------------------------------------|------------|-------------------|------------|-----------------|---------------|------------------|--------------------|
| MULTI-PURPOSE | | | | | | | | |
| 60 CA | General Purpose | 43 | 42 | >80 | 2–60 | Web | Applicator | 9501, 6501 |

Solvent and Water Based Adhesives

| Product | Available Format | Solids Weight Percent (Approx.) | Key Characteristics |
|---|--|---------------------------------|--|
| MULTI-PURPOSE | | | |
| Multi-Purpose 27 | Aerosol | 21% | Fast tack. Lightweight applications. Mist spray pattern. |
| General Purpose 60 CA | 5 gal, 54 gal Large, Int and Jumbo Cylinder | 43% 42% | High solids for increased coverage. High tack general purpose adhesive. |
| HoldFast 70 | 5 gal, 52 gal Large, Int and Jumbo Cylinder | 26% 21% | Extremely versatile and very fast tackling. Unique wide web spray pattern with heavy body and low soak-in. Bonds polystyrene without degrading surface. |
| Super 77™ | Aerosol 5 gal, 52 gal Large Cylinder | 25% 36% 27% | Low soak-in for long lasting bond. High coverage and aggressive tack. Bonds quickly in 15 seconds. |
| Super 77™ CA Multi-Purpose (Low VOC) | Aerosol | 19% | Aggressive tack. Quick bonding. Long bonding range. |
| Fastbond™ Insulation Adhesive 49 | 5 gal box, 5 gal, 52 gal, 100 gal, 255 gal | 55% | Fast tacking, high performance, pressure sensitive adhesive for lightweight materials. Low VOC and GREENGUARD Certified. UL MAGW2 component recognition. |
| HEAVY DUTY | | | |
| Neoprene Contact 5 | 5 gal, 53 gal | 19% | High performance contact adhesive. Sprayable. Fast drying. |
| Neoprene Contact 10 | 1 qt, 1 gal, 5 gal, 54 gal | 23% | Brushable and rollable with higher coverage. Meets requirements of MMM-A-121, MMM-A-130B and A-A-1936A. |
| Heavy Duty 20 | Aerosol | 17% | Fast grab. Variable width spray pattern. Forms strong bonds to a variety of substrates. |
| Hi-Strength 90 | 5 gal, 52 gal Large, Int and Jumbo Cylinder | 23% 13% | High strength. High temperature resistance. |
| Hi-Strength 90 CA (Low VOC) | Aerosol | 13% | |
| Hi-Strength 92 | 5 gal, 54 gal Large, Int and Jumbo Cylinder | 23% 23% | High strength. High temperature resistance. Versatile, high-tack adhesive. |
| Hi-Strength 94 ET (Low VOC) | 5 gal, 54 gal Large, Int and Jumbo Cylinder | 25% 25% | Bonds many laminates, woods, and particle board. Long open time, low VOC. SCAQMD Rule 1168 compliance; helps contribute to LEED® Credits. |
| Hi-Strength Postforming 94 CA (Low VOC) | Aerosol | 21% | Meets CARB / OTC VOC Requirements; helps contribute to LEED® Credits. |
| Hi-Strength 98NF | 5 gal, 54 gal Mini, Large, Int and Jumbo Cylinder | 34% 24% 21% | High solids for increased coverage. Unique non-telegraphing spray pattern with postformable strength. Low VOC, SCAQMD 1168 and LEED® Compliant. |
| Fastbond™ Contact Adhesive 30NF | 1 qt, 1 gal, 5 gal, 52 gal, 270 gal | 49% | Non-flammable, fast tack adhesive. High temperature resistance. Versatile, high-tack adhesive. |
| Fastbond™ Contact Adhesive 30H | 52 gal, 270 gal | 48% | Non-flammable water-based contact adhesive. Extremely high strength, high temperature resistant. Meets MIL-A-24179A, Type I, GREENGUARD Certified, SCAQMD 1168, LEED® Compliant. |
| Fastbond™ 2000NF | 5 gal, 50 gal, 270 gal | 49% | Long bonding range with high immediate bond strength. Economical high coverage. Low mist version of 30NF. |
| FOAM & FABRIC | | | |
| Foam & Fabric 24 | Aerosol | 17% | Aggressive tack. Foam-tearing strength. Variable width lace spray pattern. |
| Foam Fast 74 | Aerosol 52 gal Large, Int and Jumbo Cylinder | 22% 36% 22% | Extremely fast tack. Soft non-dimpling glue line. Immediate foam tearing strength. |
| Foam Fast 74 CA (Low VOC) | Aerosol | 23% | Extremely fast tack. Soft non-dimpling glue line. Immediate foam tearing strength. |
| Foam Fast 74NF | Mini, Large, Int and Jumbo Cylinder | 24% | Non-flammable. Fast tack with foam tearing strength. Soft non-dimpling bond line. |
| Fastbond™ Foam Adhesive 100NF | 1 gal, 5 gal, 52 gal, 100 gal, 255 gal | 47% | One-part, fast setting — foam and fabric adhesive. GREENGUARD Certified. Can be activated for immediate bonding. |

Solvent and Water Based Adhesives

| Product | Available Format | Solids Weight Percent (Approx.) | Key Characteristics |
|--|--|---------------------------------|---|
| SPECIALTY | | | |
| Pressure Sensitive 72 | Aerosol | 15% | Permanently tacky and repositionable. Long open time. Variable width lace spray pattern. |
| Repositionable 75 | Aerosol | 9% | Adheres in seconds. Extra long tack range. Repositionable. |
| Hi-Tack 76 | Aerosol | 13.5% | Fast tacking. One surface bonds. Variable width lace spray pattern. |
| Polystyrene 78 | 5 gal Aerosol | 19% | Bonds polystyrene with no surface degradation. Fast grabbing and fast drying. Uniform spray pattern for fast and easy application. |
| Polystyrene 78ET | Large, Int and Jumbo Cylinder | 17% | Bonds polystyrene with no surface degradation. Extended tack time for long working time. Uniform spray pattern for fast and easy application. |
| Hi-Temp Polystyrene 78HT | 5 gal, 54 gal Large, Int and Jumbo Cylinder | 27% 15% | Bonds polystyrene with no surface degradation. High temperature resistance. Can be used for roofing membrane attachment. |
| Rubber And Vinyl 80 | Aerosol | 13% | High strength. High temperature resistance. Fast setting. |
| 826 Plastic Adhesive | 1 qt, 5 gal | 23% | Fast drying for many plastic films. Resists fuels, water and oil. Thin liquid. |
| 847 High Performance Rubber & Gasket Adhesive | 5 oz, 1 qt, 1 gal, 5 gal, 54 gal | 36% | Quick drying and flexible with fuel and oil resistance. Able to reactivate with heat and solvent. Curable with heat. |
| 847H High Performance Rubber & Gasket Adhesive | 5 gal | 51% | High viscosity. Able to reactivate with heat and solvent. Curable with heat. |
| 1099 High Performance Plastic Adhesive | 5 oz, 1 qt, 1 gal, 5 gal, 54 gal | 34% | Fast drying and heat curable. Resists weathering, water, oil, plasticizer migration and aliphatic fuels. |
| 1099L High Performance Plastic Adhesive | 5 gal, 54 gal | 24% | Sprayable version of 1099H. Fast drying and heat curable. Resists weathering, water, oil, plasticizer migration and aliphatic fuels. |
| 1300 High Performance Rubber & Gasket Adhesive | 5 oz, 1 pt, 1 qt, 1 gal, 5 gal, | 37% | High immediate strength. Fast-drying and heat resistant for rubber and metal. Meets MIL-M-81288 and MMM-A-121. |
| 1300L High Performance Rubber & Gasket Adhesive | 1 qt, 1 gal, 5 gal, 54 gal | 30% | Lower viscosity for spraying. Fast-drying and heat resistant for rubber and metal. Meets MMM-A-121. |
| 1357 High Performance Contact Adhesive | 5 oz, 1 pt, 1 qt, 1 gal, 5 gal, 54 gal (Light Yellow only 5 gal and 55 gal) | 25% | Rapid build up to a very high strength bond for metal. Resists heat and continuous load stress. Meets MMM-A-121 requirements. |
| 1357L High Performance Contact Adhesive | 5 gal, 54 gal | 18% | Low viscosity. Resists heat and continuous load stress. Meets MMM-A-121 requirements. |
| 2262 Plastic Adhesive | 1 qt, 5 gal | 27% | Clear and non-staining. Resists plasticizer migration for bonding many flexible vinyls. Fast tack. |
| 4475 Industrial Plastic Adhesive | 5 oz, 1 qt, 5 gal | 43% | Clear plastic adhesive. Fast drying. Strong environmental resistance. |
| 4491 Industrial Adhesive | 5 gal, 54 gal | 24% | Securely bonds vinyl with resistance to plasticizer migration. Versatile plastic adhesive. Excellent environmental resistance. |
| 4550 Industrial Adhesive | 5 gal, 54 gal | 33% | Adding tack to large surfaces. Translucent. Long bonding range. |
| 4693 High Performance Industrial Plastic Adhesive | 5 oz, 1 qt, 1 gal, 5 gal, 54 gal, (High viscosity only 5 oz) | 26% | Excellent plastic adhesive. Long tack range. Water and heat resistant. |
| 4799 Industrial Adhesive | 5 oz, 1 qt, 1 gal, 5 gal | 32% | Water and heat resistant. Dries rapidly. EPDM bonder. |
| Fast Tack 1000NF | 1 gal, 5 gal, 52 gal, 255 tote | 49% | One-part immediate handling strength. Low overspray and high coverage. Bonds a wide variety of substrates with high temperature resistance. |
| Pressure Sensitive Adhesive 4224NF | 5 gal , 52 gal | 41% | Water-based, plasticizer resistant adhesive. Permanent pressure sensitive adhesive with an aggressive tack. Low VOC and GREENGUARD Certified. |
| Fastbond™ Spray Activator 1 | 1 qt, 1L spray bottle, 5 gal, 30 gal | N/A | GREENGUARD Certified. Low VOC and LEED® Compliant. UL MAGW2 component recognition. |

Note: The technical information and data on these pages should be considered representative or typical only and should not be used for specification purposes.

3M™ Adhesive Sealants

**The economical choice
for high strength, long
lasting elastomeric
bonding and sealing.**

3M Adhesive Sealants are suitable for bonding and sealing a wide variety of substrates including: glass, wood, composites and plastics.

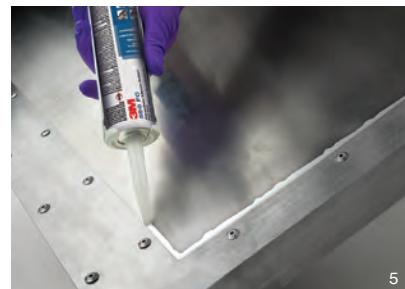

3M™ Polyurethane Sealant 740 moisture cures to a flexible seal/bond between exterior skins and metal framework and between wood flooring and metal framework. Tensile strength up to 580 psi is enough to replace mechanical fasteners in many situations.

3M™ Polyurethane Window Bonder Adhesive Sealant 595 is a fast curing one-component, high viscosity polyurethane sealant for bonding windshields and other substrates requiring high strength. This adhesive sealant is certified for 1 Hour Drive Away Time.

3M™ Marine Adhesive Sealant 4000 UV Fast Cure cures completely in only 48 hours to a strong flexible bond/seal. Applications include: assembly above or below the waterline such as, hull and stern joints, hull to deck seams, marine hardware and more.

3M™ Polyurethane Sealant 560 is an all-purpose, single-component, moisture-curing, gap-filling polyurethane that creates permanently elastic seals and bonds in a wide variety of substrates.

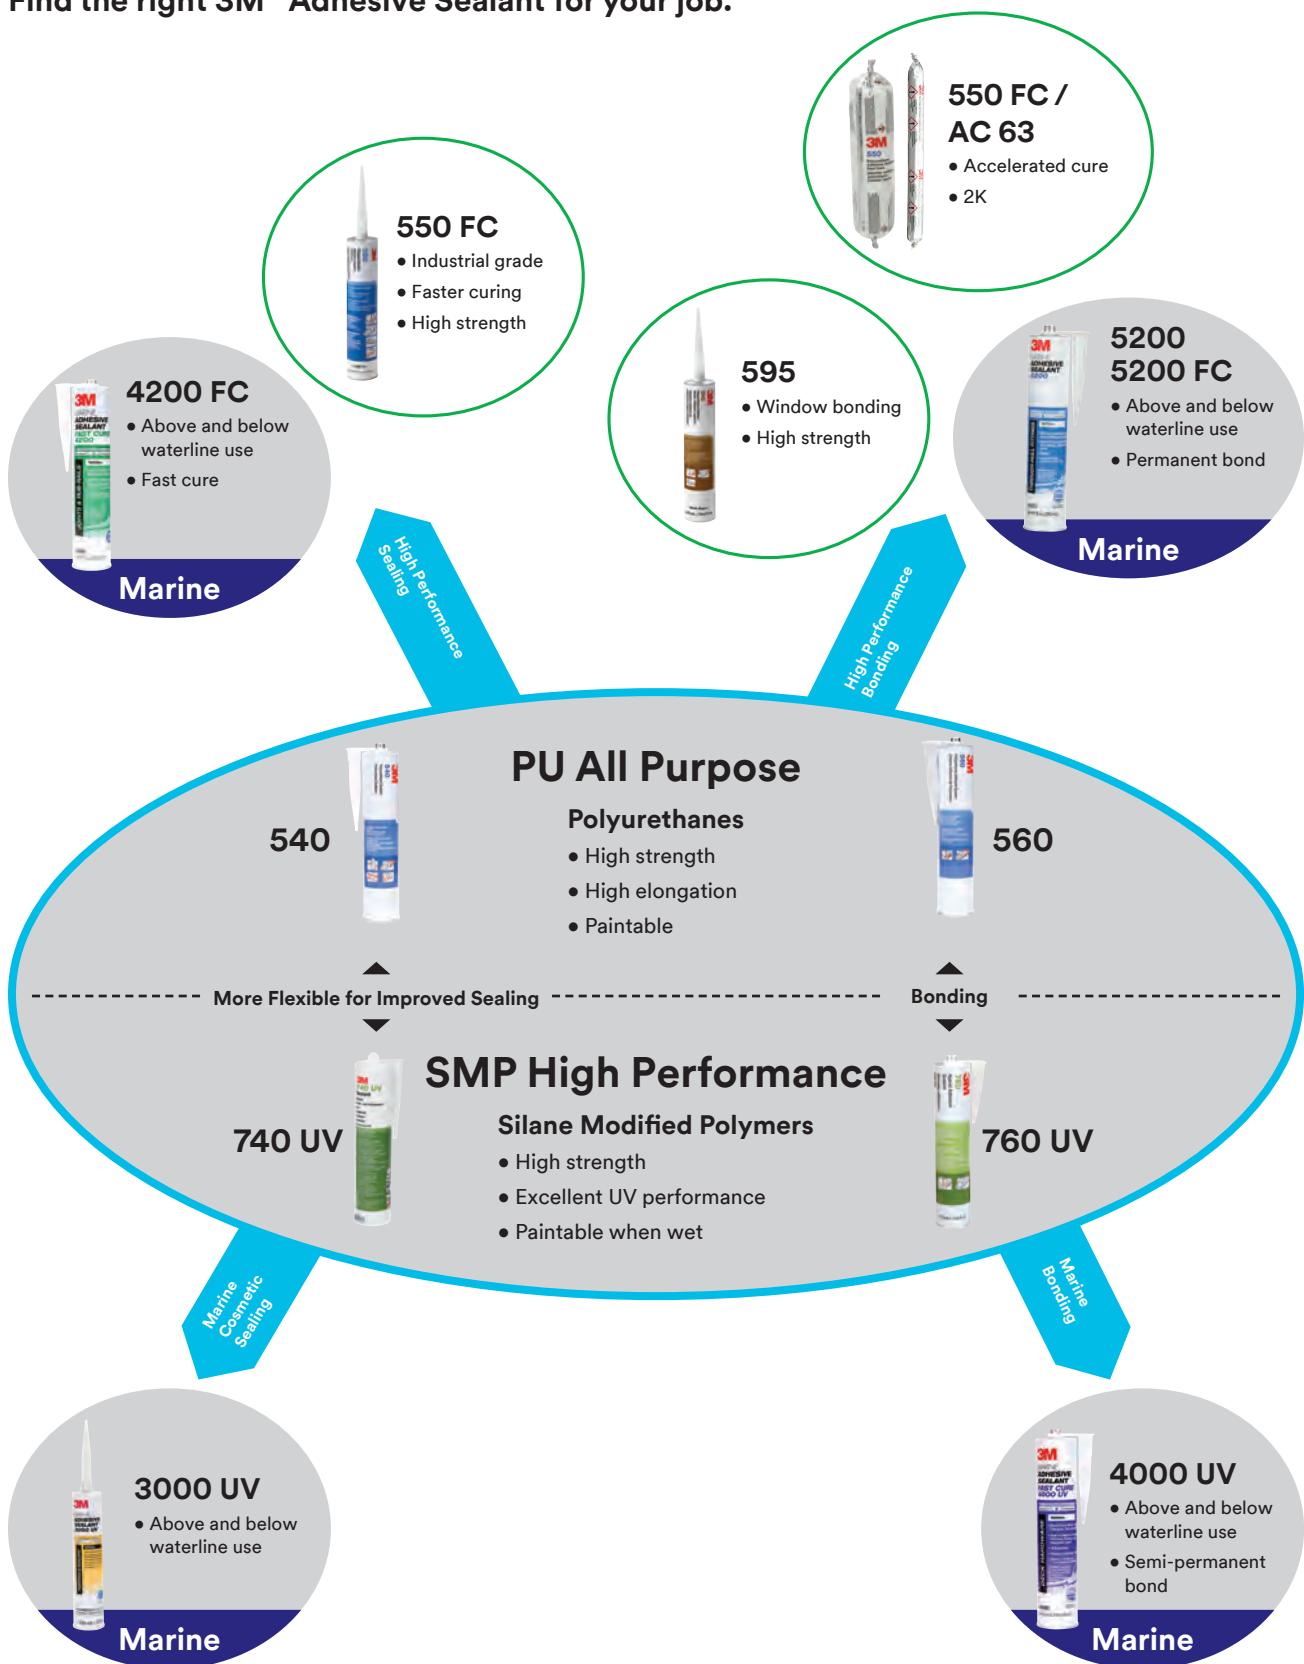

Seam sealing ductwork with 3M™ Polyurethane Sealant 540 will prevent air and dust intrusion. Its flexibility assists with vibration damping.

3M™ Adhesive Sealant 740 UV has superior UV resistance that is ideal for sealing seams and filling gaps for exterior applications.

Durable, flexible bonding and sealing.

Find the right 3M™ Adhesive Sealant for your job.

3M™ Concrete Repair Products

Fast, Convenient Crack and Spall Repair, Expansion Joints, Custom Threading and Anchoring, and More

3M™ Concrete Repair Products offer a complete line of conveniently packaged and dispensed adhesives/sealants for every job from cracks and joints to spalls and more.

Repairs are long lasting with strong, flexible bonds that resist weathering, expansion and contraction.

Fast setting allows you and your customers to drive on repaired surfaces in as few as five minutes. You can choose non-sag or self-leveling formulations for repairs on both vertical and horizontal surfaces. Non-sag formulation facilitates step and ledge repair.

3M™ Concrete Repair 600
Smoothly flows smoothly into cleaned cracks and gaps and hardens in as little as 5 minutes.

50mL and 12 fl oz duo-pak cartridges, 5-gallon pails and 55 gallon drums are available to meet your production volume requirements. Nozzle automatically and precisely meters, mixes, and dispenses two-part urethane formulation. Apply material precisely where needed to conserve material.

Make fast work of lengthy expansion or control joints and other larger jobs with the heavy-duty manual applicator and 12 fl oz duo-pak cartridges.

3M concrete repair formulations harden to any depth without cracking for custom threading and anchoring.

Notes:

Convenience meets extreme bonding power.

Powerful Bonding Solutions

Help your customers successfully bond a variety of materials with strength and speed for permanent, structural and repositionable applications. Our double-sided bonding tapes provide shear strength, conformability, surface adhesion and temperature resistance.

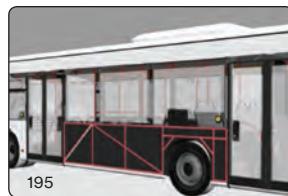

Dream. Design. Deliver.

Since 1980, 3M™ VHB™ Tape has offered unlimited design and application possibilities. By working with 3M's engineering experts, product designers know they can count on this reliable solution. Lab-tested and proven in the real world, 3M™ VHB™ Tape eliminates rivets, bolts, screws and welds.

- Durability for long-term performance indoors and out
- Productivity through application ease and versatility
- Instant bonding
- Smooth, invisible appearance
- Viscoelastic properties absorb shock and distribute stress evenly over the bond line
- Bond dissimilar materials with confidence

194

195

3M™ VHB™ Tape bonds panels to a bus on contact. The tape seals against water, moisture and more. Bonding power eliminates mechanical fasteners for a smooth, clean surface. Viscoelastic properties help absorb shock and vibration for bond reliability.

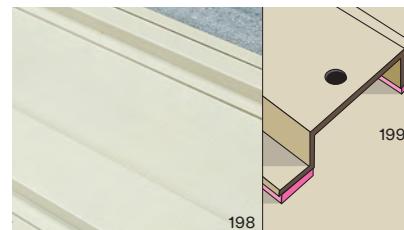

368

To join a variety of materials for high impact visual combinations throughout a refrigerator, 3M™ VHB™ Tape bonds painted and unpainted metal, HSE and LSE plastics, ceramics and more.

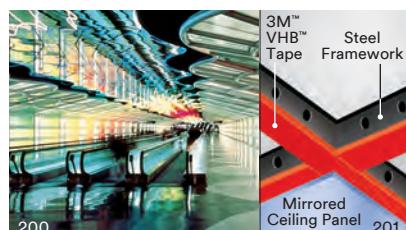

197

For assembly efficiency, die-cut pieces of 3M™ VHB™ Tape bond components on a laptop.

198

3M™ VHB™ Tapes bond panel stiffeners on contact to pre-painted metal cabinetry. Unlike welding, applying the tape does not damage the finish.

Mirrored ceiling panels are held in place with 3M™ VHB™ Tapes rather than screws. This helps maintain a clean, smooth appearance without distorting the reflective surfaces.

3M™ VHB™ Tape
Steel Framework
Mirrored Ceiling Panel

200
201

202

For a heat resistant bond, 3M™ VHB™ Tape GPH Series bonds and seals stainless steel trim to the glass oven door with strength enough to replace mechanical fasteners. Door surface is smooth and attractive.

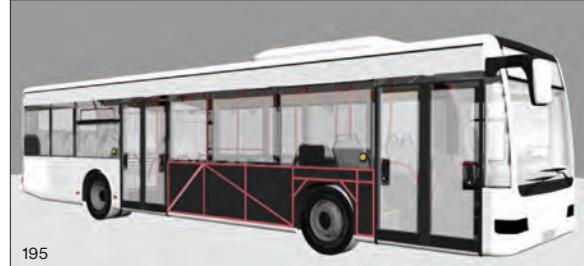

203

With high holding power and long-term reliability, 3M™ VHB™ Tape bonds dimensional letters to a painted wall for indoor or outdoor signage.

3M™ VHB™ Tapes — Typical Applications

3M™ VHB™ Tape is a proven high-strength alternative to screws, rivets, welds and other forms of traditional fastening methods. While a screw or a rivet can join two substrates at a single point, 3M™ VHB™ Tape permanently adheres one substrate to another and spreads the stress load across the entire length of the joint. The most common applications for 3M™ VHB™ Tape are:

- Reduce weight and solve dynamic force challenges
- Create a clean appearance

- Exceptional vibration and corrosion resistance
- Deliver unique designs

- Securely seal dissimilar materials
- Enhance productivity
- Create innovative designs

- Unlimited opportunities to enhance products
- Flexibility of production and design

Liner Types:

A – 3 mil 54# Densified Kraft Paper
 B – 5 mil Clear Polyethylene Film
 C – 2 mil Polyester Film
 D – 5 mil Red Polyethylene Film
 E – 4 mil 58# Polycoated Kraft Paper
 F – 5 mil Red Printed Polyethylene Film
 G – 3 mil Clear Polyethylene Film
 H – 5 mil Green PE Film

Relative Adhesion:

HSE – High Surface Energy
 LSE – Low Surface Energy

Multi-purpose Acrylic: Bonds to a wide range of materials including metals, glass, and high and medium surface energy plastics and paints. Resists migration of plasticizers in vinyl substrates.

Modified Acrylic: Bonds to medium low surface energy paints and plastics, including many powder coated paints in addition to the substrates listed with the multi-purpose acrylic adhesive (except plasticized vinyl).

General Purpose Acrylic: Bonds to most higher surface energy substrates including metal, glass and high surface energy plastics.

Low Temperature Acrylic: Bonds down to 32°F (0°C) compared to 50°F (10°C) for most acrylic adhesives. Bonds most high surface energy substrates including metal, glass and high surface energy plastics.

Low Surface Energy: High performance synthetic adhesive bonds to many lower surface energy substrates, including many plastics and powder coated paints, plus smooth general purpose substrates.

Note: The technical information and data on these pages should be considered representative or typical only and should not be used for specification purposes.

3M™ VHB™ Tapes

| Product | Tape Thickness w/o Liner mils (mm) | Liner Type | Description | Adhesive Type | Temp. Resistance | | Solvent Resistance | Relative Adhesion | | Application Ideas | | | | |

3M™ VHB™ Thin Foam Tapes

With a uniquely thin form, 3M™ VHB™ Thin Foam Tapes go where thicker foam tapes simply can't, while still providing the same great benefits of regular 3M™ VHB™ Tapes. Common applications include LCD, lens and touch panel bonding, logo attachment and point of purchase displays.

3M™ VHB™ Tape for Commercial Vehicles and Trailers

Built Tough with Smooth Sides to Look Good for the Long Haul

For durability and smooth sides on trailers, trucks, buses, and other commercial vehicles, 3M™ VHB™ Tapes are proven to go the distance.

- 3M™ VHB™ Tape is up to 41% quieter than mechanical fasteners with up to 30% less vibration at highway speeds
- Surfaces of truck panels are aesthetically smooth and graphics apply easily
- Permanently bonds and seals

3M™ VHB™ Tapes for Commercial Vehicles and Trailers are only available through authorized distributors and a warranty may be available on pre-approved applications.

Mechanically fastened at 36,000 miles — leaks at less than 75 psi.

Smooth sides with 3M™ VHB™ Tape at 100,000 miles — no leaks at 3200 psi.

| Product | Tape Thickness w/o Liner mils (mm) | Liner Type | Description | Adhesive Type | Temp. Resistance | | Solvent Resistance | Application Ideas | |

3M™ VHB™ Structural Glazing Tapes

Application Ease and Immediate Handling Strength for Increased Productivity

3M™ VHB™ Structural Glazing Tapes have been proven in thousands of buildings worldwide since 1990 as an alternative to structural silicone and spacer tapes/gaskets.

Immediate handling strength results in faster throughput and delivery. No mixing or curing simplifies manufacturing.

Proven technology with a 30+ year history in construction, an application warranty* is available for qualifying applications in select countries.

| Product | Tape Thickness w/o Liner mils (mm) | Liner Type | Description | Adhesive Type | Temp. Resistance | | Relative Adhesion | | Solvent Resistance |

| | | | | | Min Hr+ | Days Weeks | HSE | LSE | |
| G23F | 90 (2.3) | F | Gray, closed-cell acrylic foam carrier. Conformable. | Multi-purpose Acrylic | 300°F (149°C) | 200°F (93°C) | High | Med | High |
| B23F | | | Black, closed-cell acrylic foam carrier. Conformable. | | | | | | |

*3M™ VHB™ Structural Glazing Tapes are only available for structural glazing applications approved by 3M Technical Service through select distributors. See key on page 74.

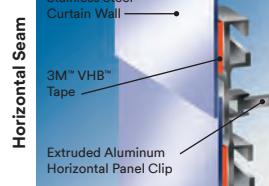

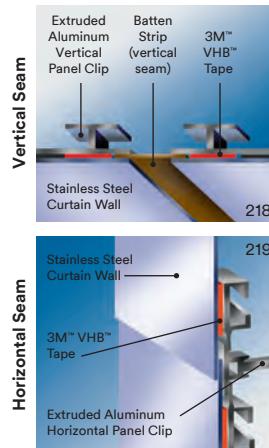

3M™ VHB™ Architectural Panel Tapes

Proven for More Than 30 Years in Applications from Denver to Singapore

For quick permanent assembly of cladding and curtain wall panels, 3M™ VHB™ Tapes provide an ideal combination of durability, performance and application ease.

Bond to a wide range of architectural panel substrates including dissimilar materials. With design flexibility, create visibly stunning facades.

Application warranty available for qualifying applications in select countries.

3M™ VHB™ Tape for Windows and Doors

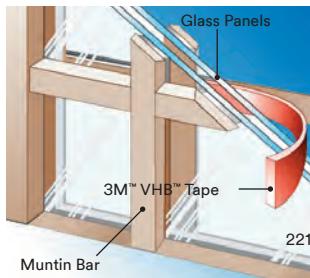

292

Attach Wood, Vinyl, Composite or Painted Metal Muntin Bars to Windows

These high strength tapes conform to glass with good wet-out and resistance to UV light, thermal expansion and contraction, solvents and cleaners. Tapes below are available only for approved window and door customers. Pre-approved applications may be eligible for a 10-year warranty.

See 3M™ Primers on page 79.

3M™ VHB™ Tape for Sign and Display

Reliable and Immediate Bonding

For indoor and outdoor signage, 3M™ VHB™ Tapes hold immediately without the work of screws and the mess and curing time of liquid adhesives.

- Bond metals, plastics, glass, foam board and more
- Invisible fastening for smooth, attractive surfaces

3M™ VHB™ Tape provides durable bonding in outdoor applications.

Clear 3M™ VHB™ Tape permanently bonds aluminum letters to glass and appears almost invisible from behind the pane.

3M™ VHB™ Tape for Appliances

3M™ VHB™ Tape is the Ultimate Solution for Appliance Design Applications

From the kitchen to the laundry room, trust in 3M™ VHB™ Tape to expand design freedom in everything from how the side panels hold together to the way a brand's logo is displayed. Thanks to the viscoelastic properties of 3M™ VHB™ Tape, OEM consumer and commercial design engineers and manufacturers have access to a new realm of opportunities for beautiful, more efficient household appliance designs.

3M™ VHB™ Tape for Electronics

Electronic designs are becoming lighter, thinner and smaller every day. Bulky mechanical systems can be replaced with the incredible, strong, long-lasting viscoelastic bond of 3M™ VHB™ Tape. Expand design freedom and simplify manufacturing processes while meeting the challenges of a dynamic market and look no further than 3M™ VHB™ Tape.

3M™ Extreme Sealing Tapes

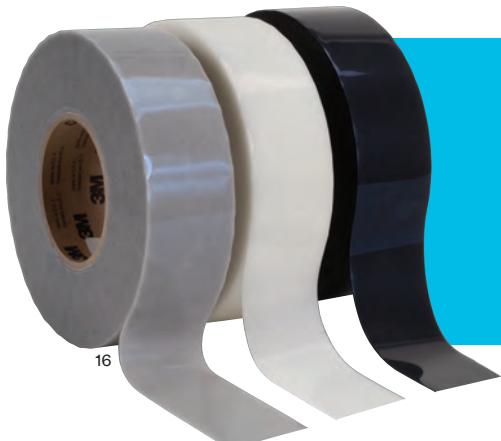

**From Trailer, Bus and Rail
Car Roof Seams to Metal
Enclosures, a Sure Winner
Over Traditional Sealants**

- Sticks on contact to many metals and plastics without dripping, oozing or clean-up
- Increases productivity throughput with no drying time; immediately paintable*
- Conforms over contours, edges, rivets and screw heads for a water tight seal
- Looks neat and precise for improved aesthetics
- Outstanding resistance to many common industrial solvents
- Excellent resistance to abrasion and high pressure washing

*Accepts many paints. Test paint on tape to check for compatibility.

44

16

Suggested Uses

- RV trailer and roofs
- Metal enclosures
- Awnings
- Trailer home roofs
- Metal storage buildings
- Vent stacks/windows
- Gutters and downspouts
- Skylights
- Outdoor signs/displays
- Leak patching and repairs

3M™ Double Coated Foam Tapes

Flexible Foam Carriers Fill Gaps and Help Bond Irregular Surfaces

In bonding rough or irregular surfaces, 3M™ Double Coated Foam Tapes fill gaps and distribute stress uniformly over the bonded area.

- Bond line that seals, cushions and damps vibration
- Resists impact
- Withstands a wide temperature range to meet your application requirements
- Provides good insulating qualities
- Select from rubber or acrylic adhesive and a choice of different foam carriers: urethane, polyethylene or acrylic

229

230

To replace screws and liquid adhesives, 3M™ Multipurpose Mounting Tape 4016 bonds immediately to many indoor surfaces, even permanently mounting a plastic soap dispenser to a mirror.

231

3M™ Double Coated Foam Tapes can be precisely die-cut and pre-applied to the back of any shape. Ready to mount to a variety of surfaces.

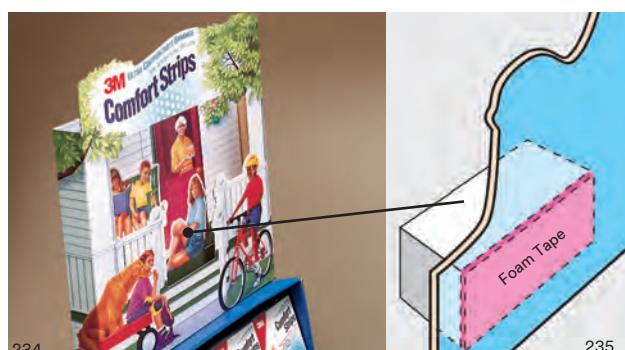

232

To permanently mount to a textured wall, 3M™ Extra Thick Multipurpose Mounting Tape 4008 bonds on contact and fills gaps between the surfaces.

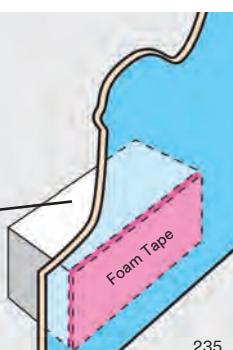

233

3M™ Double Coated Urethane Foam Tapes bond plastic signs to painted cinder block. The foam fills gaps between irregular surfaces. Various foam thicknesses are available for surface conformance based on the degree of roughness.

234

3M™ Double Coated Polyethylene Foam Tapes with high tack adhesive bond foam spacers between the planes of a 3-dimensional P.O.P. display.

3M™ Double Coated Tapes

A Variety of Carriers for Easy Handling and Dispensing

3M™ Double Coated Tapes are engineered with adhesive on both sides of paper, film or tissue. This increases the dimensional stability of the adhesive for easy handling and application.

Depending on your production volume, you can apply tape by hand or with automatic high-volume dispensers. Select paper, polyester film or other synthetic carriers to help meet your special needs. Different adhesives (rubber, silicone or acrylic) can be on opposite sides of the carrier to join different materials. Your choice of properties include high temperature resistance, conformability to irregular surfaces, high initial adhesion, high shear strength and more.

With differential adhesive, the silicone adhesive side of 3M™ Double Coated Tape adheres to a silicone rubber keypad. Acrylic adhesive side adheres to a plastic base.

Simply roll on a strip or band of 3M™ Double Coated Tape 9832 for quick edge banding with no special equipment. Pressure sensitive adhesive tape grabs with immediate handling strength for improved productivity.

3M™ Double Coated Tape 410M is the quick, convenient way to bond golf club grips to shafts. Adhesive sets up fast and bonds firmly for long-lasting performance.

For precise fit, 3M™ Double Coated Tape is pre-applied to foam gasketing materials and then die-cut to size. This helps increase dimensional stability of the part to facilitate assembly.

3M™ Removable/Repositionable Tapes

Versatility for Many Substrates on On-Off and Open-Close Applications

Some 3M™ Removable/Repositionable Tapes feature a “permanent” adhesive on one side of a film or tissue carrier and a removable/repositionable adhesive on the other side.

Other tapes in the line offer different levels of adhesion on each side. And others feature equal adhesive strength on each side for reliable attachment but with easy separation for repositioning or multiple openings and closings. You can join substrates that include glass, metals, wood, paper, painted surfaces and many plastics.

With lined versions, you can initially join one side to a surface while the other side is covered with the liner, ready to be joined later to the second surface. Linerless versions are used for bonding both surfaces at the same time.

241
3M™ Removable/Repositionable Tape seals hosiery bags for shipment and display but also lets the customer open and re-close the bag as necessary.

242
High tack side of 3M™ Removable/Repositionable Tape 9415 “permanently” adheres to cores for winding up paper or film. Low tack side releases the paper or film when unwinding.

3M™ Adhesive Transfer Tapes

Neat, Precise Application and High Performance in a Variety of Applications

3M™ Adhesive Transfer Tapes are rolls of pressure sensitive adhesive pre-applied to a special release liner.

For application, the tape is simply pressed, adhesive side down, to a surface and the liner is peeled off.

A variety of adhesive properties and liners are available to meet requirements for applications such as nameplate attachment to high and low surface energy plastics, appliance graphic overlays that perform in high temperatures, foam gasketing, web splicing and more.

With high cohesive strength, 3M™ Adhesive 200MP bonds aggressively with excellent temperature resistance. Meets the non-fogging specifications of the automotive industry.

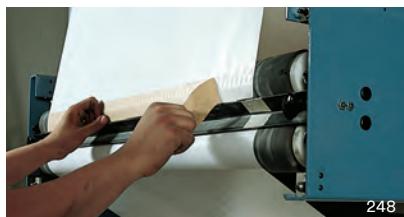

For bonding flexible vinyl in such applications as door gaskets, 3M™ Adhesive Transfer Tape F9465PC resists the effect of plasticizers that tend to migrate from the vinyl.

3M™ Laminating Adhesive 300LSE is the solution for low energy surfaces such as polyolefins and powder coat paint. Graphics hold securely and stand up to tough environmental conditions.

3M™ Adhesive Transfer Tapes provide conformability in a variety of foam laminating applications. The acrylic adhesive also provides high shear strength and good environmental aging properties.

3M™ Adhesive Transfer Tape 465 has the grab strength for many printing splices, including flying splices, zero speed and manual overlap. Can be used with a variety of paper grades.

3M™ Adhesive Transfer Tape 467MP is used to laminate metal foil to a circuit board to reduce interference on electronic circuitry.

For graphic beauty, 3M™ Acrylic Adhesive 100 attaches graphics in closed environments. With low odor, reduced outgassing and low fogging, it is used extensively in the automotive, aerospace and appliance industries.

3M™ Adhesive Transfer Tapes

| Product | Description/Application Ideas | Adhesive Caliper (mils) | Liner | | Master Size | Specs | Adhesion | | | | Chem. Resist. | Temp. Range | |
|--|---|-------------------------|------------|----------------|--------------|-------|----------|-------------|-------------|------|---------------|-------------|-----------|
| | | | Type | Caliper (mils) | | | Metal | HSE Plastic | LSE Plastic | Foam | | Low (°F) | High (°F) |
| 100MP* (High Performance Acrylic) | | | | | | | | | | | | | |
| F9460PC | High performance industrial joining and metal fabrication. | 2 | 58# PCK | 4.2 | 60" x 180 yd | UL | 10 | 7 | 1 | 2 | 10 | -40 | 500 |
| F9469PC | High performance industrial joining and metal fabrication. | 5 | 58# PCK | 4.2 | 60" x 180 yd | UL | | | | | | | |
| F9473PC | High performance industrial joining and metal fabrication. | 10 | 58# PCK | 4.2 | 60" x 180 yd | UL | | | | | | | |
| 200MP (High Performance Acrylic) | | | | | | | | | | | | | |
| 467MC | Same as 467MP with a paper MicroChannel liner to aid in bubble and wrinkle free graphic attachment. | 2 | 58# PCK | 4.2 | 54" x 180 yd | — | 10 | 9 | 1 | 3 | 9 | -40 | 400 |
| 467MCF | Same as 467MP with a polyester MicroChannel liner to aid in bubble and wrinkle free graphic attachment. | 2 | PET | 4.2 | 54" x 180 yd | — | | | | | | | |
| 467MP | Graphic attachment and general industrial joining. Industry standard. 60" width master also available. | 2 | 58# PCK | 4.2 | 48" x 180 yd | UL MH | | | | | | | |
| 467MPF | Polyester liner for rotary processing of graphic and die cut parts. | 2 | PET | 2.0 | 54" x 180 yd | UL | | | | | | | |
| 468MC | Same as 468MP with a paper MicroChannel liner to aid in bubble and wrinkle free graphic attachment. | 5 | 58# PCK | 4.0 | 54" x 180 yd | — | | | | | | | |
| 468MCF | Same as 468MP with a polyester MicroChannel liner to aid in bubble and wrinkle free graphic attachment. | 5 | PET | 4.0 | 54" x 180 yd | — | | | | | | | |
| 468MP | Industry standard for graphic attachment and die cut parts. 60" width master also available. | 5 | 58# PCK | 4.2 | 48" x 180 yd | UL MH | | | | | | | |
| 468MPF | Thicker version of 467MPF. | 5 | PET | 2.0 | 54" x 180 yd | UL | | | | | | | |
| 9667MP | Same as 467MP on heavy, lay-flat liner for kiss-cutting. 48" width master also available. | 2 | 83# PCK | 6.2 | 54" x 180 yd | UL | | | | | | | |
| 9668MP | Same as 468MP on heavy, lay-flat liner. 48" width master also available. | 5 | 83# PCK | 6.2 | 54" x 180 yd | UL MH | | | | | | | |
| 9668MPL | Better lay-flat properties. | 5 | 94# PCK | 7.0 | 60" x 180 yd | — | | | | | | | |
| 220 (Industrial Acrylic) | | | | | | | | | | | | | |
| 9502 | Economical attachment of graphics and industrial joining. 60" width master also available. | 2 | 58# PCK | 4.2 | 48" x 180 yd | UL | 8 | 7 | 1 | 2 | 8 | -40 | 350 |
| 9505 | Thicker version of 9502 for textured surfaces. 60" width master also available. | 5 | 58# PCK | 4.2 | 48" x 180 yd | UL | | | | | | | |
| 9552 | Double-lined laminating adhesive version of 9502. | 2.3 | 58/58# PCK | 4.2 | 48" x 360 yd | UL | | | | | | | |
| 9555 | Double-lined laminating adhesive version of 9505. | 4.9 | 58/58# PCK | 4.2 | 48" x 360 yd | UL | | | | | | | |

Scotch® ATG Adhesive Transfer Tapes

Finger Touch Application of Pressure Sensitive Adhesive

Versatility, convenience and speed. That's what you get with Scotch® ATG Adhesive Transfer Tapes for assembly operations in businesses ranging from appliance and printing to P.O.P. and electronics. Readily bond, join, mount, or laminate materials such as paper, plastics, metal, foam and more.

With Scotch® ATG Applicators, a touch of the finger triggers a quick, controlled application of Scotch® ATG Adhesive Transfer Tape at the same time as the liner rewinds into the applicator. There is no mess and no cleanup. 3M advanced acrylic adhesive bonds on contact and is formulated with a choice of properties such as high temperature resistance, differential tack, adhesion to low surface energy plastic and more.

229

Save time and effort with Scotch® ATG Adhesive Transfer Tapes and Applicators. You apply a precise strip of adhesive at the same time as the liner rewinds into the applicator.

Scotch® ATG Applicator 700 with Scotch® ATG Adhesive Transfer Tape 924 makes fast work of folder assembly. Pressure sensitive adhesive bonds immediately and the folder pocket is ready to hold contents.

Scotch® ATG Applicator 700 for 3/4" and 1/2" wide tape

Scotch® ATG Applicator 714 for 1/4" wide tape

Scotch® ATG Applicator 752C for 3/4", 1/2" and 1/4" wide tape (1/4" adapter purchased separately)

Scotch® ATG Applicator 3662 for 2" wide tape

3M™ Extended Liner Tapes

Versatile Pressure Sensitive Adhesive on Easy-to-Remove Liners

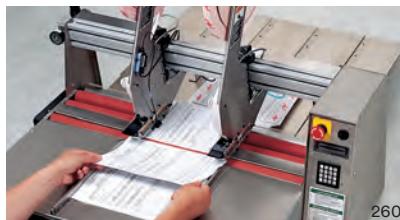

3M™ Extended Liner Tapes offer the adhesive versatility of 3M tapes but with liners wider than the adhesive. This leaves an easy-to-lift edge for convenient and easy liner removal. With the variety of adhesives, you have a selection of performance characteristics such as high tack for coated papers and plastics, low tack for temporary attachment, high temperature resistance and more. Apply manually or with equipment matched to your production volume requirements.

257

258

260

Automatic and semi-automatic equipment is available for higher volume applications. For example, apply tape to business forms, literature, bounce back and business reply cards.

259

Depending on adhesive type, 3M™ Extended Liner Tapes are applied to envelopes, polybags, boxes or tubes. User simply peels off liner to expose the adhesive for an immediate, secure closure.

261

3M™ Extended Liner Tapes 450XL, 450EK and 465XL immediately bond product information "outserts" to polyethylene bottles. Holds tightly but can be cleanly removed.

Powerful Fastening Solutions

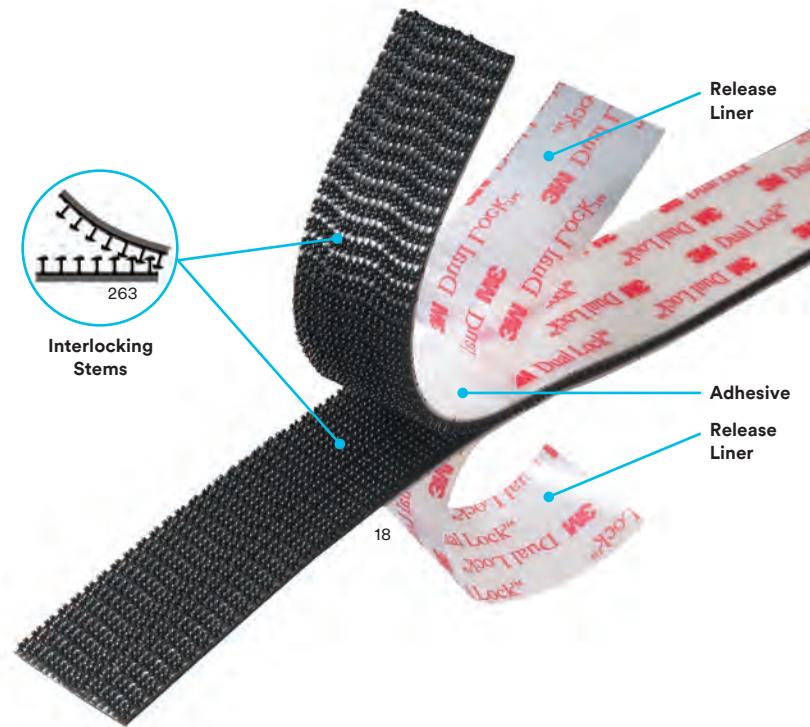

3M™ Reclosable Fasteners provide secure fastening with easy access and enhanced gripping for a wide range of applications. Weather-resistant single coated foam tapes are practical solutions that protect against moisture, dust, vibration and impact, and remain flexible.

3M™ Dual Lock™ Reclosable Fasteners

Holding Power to Replace Screws, Bolts and Rivets

Durable enough to last through repeated opening and closing. Unique mushroom-shaped heads snap shut and stay locked.

- Durable — up to 1,000 openings and closings before losing 50% of original tensile strength
- Helps reduce vibration
- Temperature, moisture and UV resistant
- Strong, pressure-sensitive adhesive bonds on contact
- Interlocking mushroom-shaped heads have **5X the tensile strength** of hook-and-loop products

Secure plastic signs to window glass.

Anchor vehicle accessories to dashboard.

Attach elevator control panel to interior wall.

Fasten ceiling panels to interior for future access.

Attach access panels to industrial, electronic and electrical equipment.

3M™ Hook and Loop Reclosable Fasteners

Hooks on One Side, Loops on the Other for Secure, Repeated Closures

- Reliable PSA holds on contact with a variety of materials
- Low profile options, as much as 75% thinner than standard product
- Up to 5,000 closures for standard Hook and Loop
- Flame resistant product available
- Also available without adhesive

Attach cushioning panels in an ambulance or bus.

Sew to the fabric and leather of jackets and gloves.

Use as a replacement for string, tapes, rubber bands, wire and strapping.

Attach removable seat cushions.

Hang graphics and banners that change frequently.

3M™ Single Coated Foam Tapes

Roll-on Protection Against Moisture, Dust, Noise, Vibration and Impact

3M™ Single Coated Foam Tapes are strips of foam in a roll with high strength acrylic adhesive on one side of the foam. Cut to length, they seal, damp, insulate or cushion. For die-cut shapes, 3M™ Single Coated Foam Tape Series 4100, 4300, and 4700 is protected by a liner. With 3M™ Single Coated Foam Tape Series 4500, the liner is on the non-adhesive side to minimize foam stretching while placing the gasket.

Urethane foams seal, cushion, damp sound, and absorb vibration.

Weather-resistant vinyl foams seal out light and dust when under compression and remain flexible even when exposed to variable temperatures and UV.

In a computer printer, 3M™ Urethane Foam Tape 4318 is a very soft, low density cushion that helps absorb impact and vibration.

To help prevent light leakage around a sign perimeter, 3M™ Vinyl Foam Tape 4726 attaches securely on contact.

When compressed 50%, the open cell construction of 3M™ Urethane Foam Tape 4314 provides an air barrier and cushion in electronic equipment.

In outdoor mailboxes, strips of 3M™ Vinyl Foam Tape 4504 helps seal the inside from rain and dirt. Vinyl provides excellent aging characteristics and remains flexible.

| Product | Color | Description | Adhesive | Approximate Thickness in (mm) | Density lb/cu ft (kg/cu m) | Tensile Strength psi (kPa) | Compression Deflection 25% psi (kPa) | Compression Set % Loss | Temperature Tolerance | |

3M™ Converter Markets Center

Converting 3M Technology into Successful Applications

3M Converters match 3M technologies to customer requirements with the exact form, fit, and functionality for application success in identifying, bonding, protecting, and electrical shielding or conducting.

Converter expertise includes part design, quick prototyping, laminating adhesives to various surfaces, printing labels and durable graphics, slitting, and die-cutting.

3M technologies include the following:

- 3M™ Performance Label Materials
- 3M™ Thin Attachment Tapes
- 3M™ Adhesive Transfer and Double Coated Bonding Tapes such as 3M™ VHB™ Tapes
- 3M™ Single Coated Tapes such as crepe masking tape
- 3M™ Reclosable Fasteners
- 3M™ Bumpon™ Protective Products
- And more

3M™ Performance Label Materials with Structured Adhesive — With unique microchannels throughout the structured adhesive, air flows freely from between the label adhesive and substrate. Hand-applied large labels go on smoothly and stay that way permanently without unsightly wrinkles and bubbles.

For permanent attachment of die-cut durable graphics, 3M™ Low Surface Energy (LSE) Acrylic Adhesive 300 bonds on contact and stays tight on low surface energy plastics, powder coated paints, and lightly oiled metals.

Dimensionally-stable 3M™ Double Coated Tapes are pre-applied to foam gasketing material and die-cut to precise shape and size for fast, easy application.

3M converters can slit 3M™ Masking Tapes to specified widths and roll lengths, as well as die-cut to unique shapes for specialized applications.

For hundreds to thousands of openings and closings, 3M converters customize 3M™ Reclosable Fasteners to meet exact customer requirements for form, fit, mating strength, and liner.

For a little touch of quiet and skid resistance on a PDA or other small product, custom 3M™ Bumpon™ Protective Products are scaled for the design. Adhesive is formulated to hold even a small bonding surface.

From the 150,000 possible combinations of adhesives, facestocks, overlaminates and liners, 3M has many choices for durable labels requiring UL and/or RoHS compliance.

Notes:

Product Selection and Use: Many factors beyond 3M's control and uniquely within user's knowledge and control can affect the use and performance of a 3M product in a particular application. As a result, customer is solely responsible for evaluating the product and determining whether it is appropriate and suitable for customer's application, including conducting a workplace hazard assessment and reviewing all applicable regulations and standards (e.g., OSHA, ANSI, etc.). Failure to properly evaluate, select, and use a 3M product and appropriate safety products, or to meet all applicable safety regulations, may result in injury, sickness, death, and/or harm to property.

Warranty, Limited Remedy, and Disclaimer: Unless a different warranty is specifically stated on the applicable 3M product packaging or product literature (in which case such warranty governs), 3M warrants that each 3M product meets the applicable 3M product specification at the time 3M ships the product. 3M MAKES NO OTHER WARRANTIES OR CONDITIONS, EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, ANY IMPLIED WARRANTY OR CONDITION OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, OR ARISING OUT OF A COURSE OF DEALING, CUSTOM, OR USAGE OF TRADE. If a 3M product does not conform to this warranty, then the sole and **exclusive remedy is, at 3M's option, replacement of the 3M product or refund of the purchase price.**

Limitation of Liability: Except for the limited remedy stated above, and except to the extent prohibited by law, 3M will not be liable for any loss or damage arising from or related to the 3M product, whether direct, indirect, special, incidental, or consequential (including, but not limited to, lost profits or business opportunity), regardless of the legal or equitable theory asserted, including, but not limited to, warranty, contract, negligence, or strict liability.

3M, Bumper, Dual Lock, Fastbond, Scotch-Seal, Scotch-Weld, Super 77, VHB and Weatherban are trademarks of 3M Company. Scotch is a registered trademark of 3M Company. All other trademarks are property of their respective owners.
